Datasheet for ABIN1658504

EIF3K Protein (AA 1-240) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	EIF3K
Protein Characteristics:	AA 1-240
Origin:	C. elegans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This EIF3K protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MSFEKLQKEL HEAIEGVNRY NPENVADLAA CVQAMVNENK YDKDIVLTIL KLYQLNPEKY DEAVVRQVLL KTLMVLPSSD FALAKCLIDT NRLGSQELRR IFDLGAVLES CNFAVFWKLV KGAYKPTTNP NEPFKVPGEV PKMIKPMVGF EDAVKHYACR VISVTFQKIE KKMLSRLLGG ASDKEVTALA QSFGWEAKEN GDVFFVANHE GTIKTRNIDE KIQFPHVADL LTSIQPPLTL
Specificity:	Caenorhabditis elegans
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	EIF3K

Target Details

Alternative Name:	Eukaryotic translation initiation factor 3 subunit K (eif-3.K) (EIF3K Products)
Background:	Recommended name: Eukaryotic translation initiation factor 3 subunit K. Short name= eIF3k. Alternative name(s): eIF-3 p25
UniProt:	Q9XUP3
Pathways:	Ribonucleoprotein Complex Subunit Organization

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
