

### Datasheet for ABIN101521

# Goat anti-Human IgG (Heavy & Light Chain) Antibody (Alkaline Phosphatase (AP)) - Preadsorbed

Go to Product pag

# 1 Image

Overview	
Quantity:	1 mg
Target:	IgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Human
Host:	Goat
Clonality:	Polyclonal
Conjugate:	Alkaline Phosphatase (AP)
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)
Product Details	
- Toddet Details	
Immunogen:	Immunogen: Human IgG whole molecule
	Immunogen: Human IgG whole molecule IgG
Immunogen:	
Immunogen: Isotype:	IgG
Immunogen: Isotype: Specificity:	IgG IgG (H&L)
Immunogen: Isotype: Specificity: Characteristics:	IgG IgG (H&L) Concentration Definition: by UV absorbance at 280 nm
Immunogen: Isotype: Specificity: Characteristics: Purification:	IgG IgG (H&L) Concentration Definition: by UV absorbance at 280 nm Preadsorption: Solid phase absorption
Immunogen: Isotype: Specificity: Characteristics: Purification: Sterility:	IgG IgG (H&L) Concentration Definition: by UV absorbance at 280 nm Preadsorption: Solid phase absorption

## **Target Details**

Target Type:	Antibody
Background:	Synonyms: goat anti-Human IgG Alkaline Phosphatase Conjugation, goat anti-Human IgG ALP
	conjugate, goat anti-human IgG Alk Phos conjugated antibody
	Background: Anti-Human IgG (H&L) Alkaline Phosphatase generated in goat detects human
	Immunoglobulin G (IgG), both heavy and light chains of the antibody molecule are present. It is
	a protein complex composed of four peptide chains - two identical heavy chains and two
	identical light chains arranged in a Y-shape typical of antibody monomers. Each IgG has two
	antigen binding sites. Representing approximately 75 % of serum immunoglobulins in humans,
	IgG is the most abundant antibody isotype found in the circulation. IgG molecules are
	synthesized and secreted by plasma B cells. Secondary Antibodies are available in a variety of
	formats and conjugate types. When choosing a secondary antibody product, consideration
	must be given to species and immunoglobulin specificity, conjugate type, fragment and chain
	specificity, level of cross-reactivity, and host-species source and fragment composition.

### **Application Details**

Ann	lication	Notes:
ANN	iication	NOLES.

Immunohistochemistry Dilution: 1:200 - 1:1,000

Application Note: This product has been assayed against 1.0  $\mu$ g of Human IgG in a standard capture ELISA using pNPP p-nitrophenyl phosphate code # NPP-10 as a substrate for 30 minutes at room temperature. A working dilution of 1:3,000 to 1:15,500 of the reconstitution concentration is suggested for this product.

ELISA Dilution: 1:2,000 - 1:10,000 Western Blot Dilution: 1:500 - 1:2,500

Restrictions:

For Research Use only

### Handling

Format:	Liquid
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.05 M Tris Chloride, 0.15M Sodium Chloride, 0.001M Magnesium Chloride, 0.0001M
	Zinc Chloride, 50 % (v/v) Glycerol, pH 8.0
	Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
	Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which

#### Handling

	should be handled by trained staff only.
Handling Advice:	Do not freeze! Freezing alkaline phosphatase conjugates will result in a substantial loss of
	enzymatic activity.
	Do not add Sodium azide.
	Dilute only prior to immediate use
	Each reagent is stable for the period shown on the bottle label if stored as directed.
Storage:	4 °C
Expiry Date:	12 months
