

Datasheet for ABIN101688

Chicken anti-Mouse IgG (Heavy & Light Chain) Antibody (Biotin) - Preadsorbed

Go to Product pag

1 Image

Overview	
Quantity:	1 mg
Target:	IgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Mouse
Host:	Chicken
Clonality:	Polyclonal
Conjugate:	Biotin
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)
Product Details	
Troduct Details	
Immunogen:	Immunogen: Mouse IgG whole molecule
	Immunogen: Mouse IgG whole molecule IgG
Immunogen:	
Immunogen: Isotype:	IgG
Immunogen: Isotype: Specificity:	IgG IgG (H&L)
Immunogen: Isotype: Specificity: Characteristics:	IgG IgG (H&L) Concentration Definition: by UV absorbance at 280 nm
Immunogen: Isotype: Specificity: Characteristics: Purification:	IgG IgG (H&L) Concentration Definition: by UV absorbance at 280 nm
Immunogen: Isotype: Specificity: Characteristics: Purification: Target Details	IgG (H&L) Concentration Definition: by UV absorbance at 280 nm Preadsorption: Solid phase absorption

Target Details

Background:

Synonyms: Chicken Anti-MOUSE IgG Biotin Conjugated Antibody, Chicken Anti MOUSE IgG Antibody Biotin Conjugation

Background: Anti-Mouse IgG Biotin Antibody generated in chicken detects reactivity to Mouse IgG. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Application Details

Application Notes:

Immunohistochemistry Dilution: 1:1,000 - 5,000

Application Note: This product has been assayed against 1.0 µg of Mouse IgG in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to 1:20,000 of the reconstitution concentration is suggested for this product.

ELISA Dilution: 1:20,000 - 1:100,000

Western Blot Dilution: 1:2,000 - 1:10,000

Restrictions:

For Research Use only

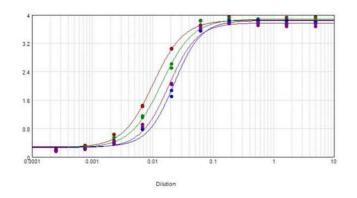

Handling

Format:	Lyophilized
Reconstitution:	Reconstitution Volume: 1.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent)
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free

Handling

	Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Aliquot to Avoid repeated freezing and thawing.
Storage:	RT,4 °C,-20 °C
Expiry Date:	12 months

ELISA

Image 1. ELISA results of purified Chicken anti-Mouse IgG Biotin Conjugated Antibody tested against Mouse IgG. Each well was coated in duplicate with 1.0 μg of Mouse IgG (blue line). The starting dilution of antibody was 5μg/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using Blocking buffer MB-060-1000, Streptavidin HRP conjugate, and TMB-1000 substrate.
