Rabbit anti-Mouse IgG (Heavy & Light Chain) Antibody (Alkaline Phosphatase (AP)) - Preadsorbed

Go to Product pag

1 Image

Overview	
Quantity:	1 mg
Target:	IgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	Alkaline Phosphatase (AP)
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)
Product Details	
Immunogen:	Immunogen: Mouse IgG whole molecule
Isotype:	IgG
Specificity:	IgG (H&L)
Characteristics:	Concentration Definition: by UV absorbance at 280 nm
Purification:	Preadsorption: Solid phase absorption
Sterility:	Sterile filtered
Target Details	
Target:	IgG
Abstract:	IgG Products

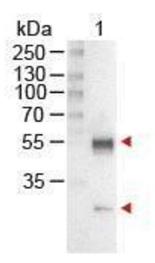

Target Details	
Target Type:	Antibody
Background:	Synonyms: rabbit anti-Mouse IgG Antibody alkaline phosphatase conjugation, rabbit anti-Mouse
	IgG alk phos conjugated Antibody
	Background: Anti-Mouse IgG Alkaline Phosphatase antibody generated in rabbit detects
	reactivity to Mouse IgG. Secreted as part of the adaptive immune response by plasma B cells,
	immunoglobulin G constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to
	viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via
	agglutination (and thereby immobilizing them), activation of the compliment cascade, and
	opsinization for phagocytosis. The whole IgG molecule possesses both the F(c) region,
	recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the
	epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present.
	Secondary Antibodies are available in a variety of formats and conjugate types. When choosing
	a secondary antibody product, consideration must be given to species and immunoglobulin
	specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-
	species source and fragment composition.
Application Details	
Application Notes:	Immunohistochemistry Dilution: 1:200 - 1:1,000
	Application Note: Conjugated Secondary Antibodies are ideal for western blotting,
	Immunohistochemistry and ELISA as well as other antibody detection methods.
	ELISA Dilution: 1:2,000 - 1:10,000
	Western Blot Dilution: 1:500 - 1:2,500
Comment:	Secondary antibody reagents are available in a variety of formats and conjugate types. When
	choosing a secondary antibody product, consideration must be given to species and
	immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-
	reactivity, and host-species source and fragment composition.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.05 M Tris Chloride, 0.15M Sodium Chloride, 0.001M Magnesium Chloride, 0.0001M
	Zinc Chloride, 50 % (v/v) Glycerol, pH 8.0

Images

	Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Do not freeze! Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic activity. Do not add Sodium azide. Dilute only prior to immediate use
	Each reagent is stable for the period shown on the bottle label if stored as directed.
Storage:	4 °C
Expiry Date:	12 months

Western Blotting

Image 1. Western Blot of Rabbit anti-Mouse IgG Antibody Alkaline Phosphatase Conjugated Lane 1: Mouse IgG Load: 100 ng per lane Secondary antibody: MOUSE IgG (H&L) Antibody Alkaline Phosphatase Conjugated at 1:1,000 for 60 min at RT Block: ABIN925618 for 30 min at RT Predicted/Observed size: 55 and 28 kDa, 55 and 28 kDa
