## Datasheet for ABIN1043804 anti-IL-32 alpha antibody (Biotin)

1 Image

1 Publication

## Overview

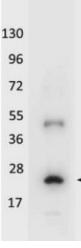

Quantity:	100 µg
Target:	IL-32 alpha (IL32A)
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This IL-32 alpha antibody is conjugated to Biotin
Application:	ELISA, Western Blotting (WB)
Product Details	
Immunogen:	This purified antibody was prepared from whole rabbit serum produced by repeated
	immunizations with full length recombinant human IL-32A protein.
	Immunogen Type: RecombinantProtein
Isotype:	lgG
Specificity:	This purified antibody has been heated to 56°C for 30 minutes. In ELISA and other
	immunoreactive assays, this antibody will recognize both native and recombinant human IL-
	32A in cell supernatants and certain body fluids. A control of similarly diluted normal rabbit IgG
	is recommended.
Characteristics:	IL-32A (also known as Natural killer cells protein 4, Tumor necrosis factor alpha-inducing factor,
	IL32alpha, Interleukin-32 and IL-32 isoform 4) is a member of the cytokine family. IL-32a is a
	secreted protein selectively expressed in lymphocytes and plays a role in innate and adaptive
	immune responses. The protein contains a tyrosine sulfation site, 3 potential N-myristoylation
	sites, multiple putative phosphorylation sites, and an RGD cell-attachment sequence.

	Expression of this protein is increased after the activation of T-cells by mitogens or the
	activation of NK cells by IL-2. This protein induces the production of TNFalpha and IL-8. It induces typical cytokine pathways of NF-kB and p38 MAPK. Alternate transcriptional splice
Purification:	purified
Target Details	
Target:	IL-32 alpha (IL32A)
Alternative Name:	IL-32A (IL32A Products)
Background:	IL-32A (also known as Natural killer cells protein 4, Tumor necrosis factor alpha-inducing factor
	IL32a, Interleukin-32 and IL-32 isoform 4) is a member of the cytokine family. IL-32a is a
	secreted protein selectively expressed in lymphocytes and plays a role in innate and adaptive
	immune responses. The protein contains a tyrosine sulfation site, 3 potential N-myristoylation
	sites, multiple putative phosphorylation sites, and an RGD cell-attachment sequence.
	Expression of this protein is increased after the activation of T-cells by mitogens or the
	activation of NK cells by IL-2. This protein induces the production of TNFa and IL-8. It induces
	typical cytokine pathways of NF-kB and p38 MAPK. Alternate transcriptional splice variants,
	encoding different isoforms, have been characterized.
	Synonyms: IL-32A, Natural killer cells protein 4, Tumor necrosis factor alpha-inducing factor,
	IL32α, Interleukin-32 and IL-32 isoform 4.
Gene ID:	9235, 61658634
UniProt:	P24001
Application Details	
Application Notes:	This purified antibody has been tested for use in ELISA and western blotting. By western blot a
	band approximately 15 kDa in size corresponding to native human IL-32 $lpha$ protein is expected in
	the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by
	the end user.
Comment:	Gene Name: IL32
Restrictions:	For Research Use only

Format:	Lyophilized
Reconstitution:	Reconstitution Buffer: Restore with deionized water (or equivalent), Reconstitution Volume: 100 $\mu L$
Concentration:	1.0 mg/mL
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
Preservative:	Sodium azide
Precaution of Use:	This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C/-20 °C
Storage Comment:	Store vial at 4 °C prior to restoration. For extended storage aliquot contents and freeze at -20 °C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4 °C as an undiluted liquid. Dilute only prior to immediate use. Expiration date is one (1) year from date of opening.
Expiry Date:	12 months

## Western Blotting

**Image 1.** Western blot using HRP conjugated anti-Human IL-32A antibody shows detection of a band ~19 kDa in size corresponding to recombinant human IL-32A. The identity of the higher molecular weight band is unknown. Molecular weight markers are shown (left). After transfer, the membrane was blocked with 3% BSA in TBS followed by reaction with antibody at a 1:5,000 dilution for 30 min at room temperature. Detection occurred using TMB substrate.
