antibodies

Datasheet for ABIN1043952 Donkey anti-Guinea Pig IgG (Heavy & Light Chain) Antibody (FITC) - Preadsorbed

Image

Overview

Quantity:	1 mg
Target:	lgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Guinea Pig
Host:	Donkey
Clonality:	Polyclonal
Conjugate:	FITC
Application:	FLISA, Fluorescence Microscopy (FM)

Product Details

Immunogen:	Immunogen: Guinea Pig IgG whole molecule
Isotype:	IgG
Specificity:	Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Donkey Serum, Guinea Pig IgG and Guinea Pig Serum.
Cross-Reactivity:	Guinea Pig
Characteristics:	This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Purification:	Preadsorption: immunoaffinity chromatography using Guinea Pig IgG coupled to agarose beads

Target Details

— .	
Target:	IgG
Abstract:	IgG Products
Target Type:	Antibody
Background:	Synonyms: Donkey Anti-Guinea Pig IgG Fluorescein Conjugation, Donkey Anti-Guinea Pig IgG
	FITC Conjugated
	Background: Anti-Guinea Pig IgG Fluorescein Antibody generated in donkey detects guinea pig
	IgG. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G
	constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as
	well as fungi and facilitates their destruction or neutralization via agglutination (and thereby
	immobilizing them), activation of the compliment cascade, and opsinization for phagocytosis.
	The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc recepto
	proteins, as well as the F(ab) region possessing the epitope-recognition site. Both heavy and
	light chains of the antibody molecule are present. Secondary Antibodies are available in a
	variety of formats and conjugate types. When choosing a secondary antibody product,
	consideration must be given to species and immunoglobulin specificity, conjugate type,
	fragment and chain specificity, level of cross-reactivity, and host-species source and fragment
	composition.
Application Details	
	Application Note: This product is designed for immunofluorescence microscopy, fluorescence
	Application Note: This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for
	based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for
	based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Application Notes:	based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. FLISA Dilution: 1:10,000 - 1:50,000
Application Notes: Comment:	based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. FLISA Dilution: 1:10,000 - 1:50,000 IF Microscopy Dilution: 1:1,000 - 1:5,000
Application Details Application Notes: Comment: Restrictions: Handling	 based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. FLISA Dilution: 1:10,000 - 1:50,000 IF Microscopy Dilution: 1:1,000 - 1:5,000 Excitation/Emission wavelength: 494 nm/514 nm

Handling

Reconstitution:	Reconstitution Volume: 1.0 mL Reconstitution Buffer: Restore with deionized water (or equivalent)
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free Preservative: 0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	Product is photosensitive and should be protected from light. Centrifuge product if not completely clear after standing at room temperature.
Storage:	RT,4 °C,-20 °C
Storage Comment:	Store vial at 4 °C prior to restoration. For extended storage aliquot contents and freeze at -24 °C or below. This product is stable for several weeks at 4 °C as an undiluted liquid.
Expiry Date:	12 months

Western Blotting

Image 1. Western Blot of Donkey anti-Guinea Pig IgG Fluorescein Conjugated Antibody. Lane 1: Guinea Pig IgG. Lane 2: None. Load: 50 ng. Primary antibody: None. Secondary antibody: Fluorescein donkey secondary antibody at 1:1,000 for 60 min at RT. Block: ABIN925618 for 30 min at RT. Predicted/Observed size: 28 & 55 kDa, 28 & 55 kDa for Guinea Pig IgG. Other band(s): None.
