Datasheet for ABIN1043994 Rabbit anti-Mouse IgG (Heavy & Light Chain) Antibody (Biotin)

Overview

1

Image

Quantity:	1 mg
Target:	lgG
Binding Specificity:	Heavy & Light Chain
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	Biotin
Application:	ELISA, Immunohistochemistry (IHC), Western Blotting (WB)

Product Details

Purpose:	Mouse IgG (H&L) Secondary Antibody Biotin Conjugated
Immunogen:	Optional[Immunogen]: Mouse IgG whole molecule
lsotype:	lgG
Cross-Reactivity (Details):	Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti- Rabbit Serum, Mouse IgG and Mouse Serum.
Characteristics:	Anti-Mouse IgG Biotin Antibody generated in rabbit detects reactivity to Mouse IgG.
Purification:	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Mouse IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities.

Target Details

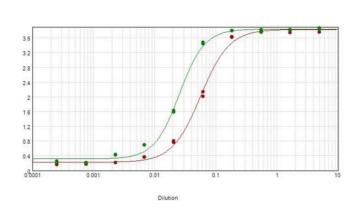

Target:	IgG
Abstract:	IgG Products
Target Type:	Antibody
Background:	Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75 % of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as
	well as fungi and facilitates their destruction or neutralization via agglutination (and thereby
	immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis.
	The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc recepto
	proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy
	and Light chains of the antibody molecule are present. Secondary Antibodies are available in a
	variety of formats and conjugate types. When choosing a secondary antibody product,
	consideration must be given to species and immunoglobulin specificity, conjugate type,
	fragment and chain specificity, level of cross-reactivity, and host-species source and fragment
	composition.
Application Details	
Application Notes:	Application Note: Mouse secondary antibody conjugated to biotin is available in a variety of
	formats. Anti-Mouse IgG Biotin Antibody has been tested by ELISA and is suitable for western
	blot, ELISA and immunohistochemistry as well as other antibody based assays requiring lot-to-
	lot consistency. Immunohistochemistry Dilution: 1:1,000 - 1:5,000 Western Blot Dilution: 1:2,00
	- 1:10,000 ELISA Dilution: 1:200,000 - 1:300,000 Other: User Optimized
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Reconstitution:	Reconstitution Buffer: Restore with deionized water (or equivalent), Reconstitution Volume: 1.0
	mL
Concentration:	1.0 mg/mL
Buffer:	Buffer: 0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2
	Stabilizer: 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
	, Preservative:0.01 % (w/v) Sodium Azide
Preservative:	Sodium azide

Handling

Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiry Date:	12 months

ELISA

Image 1. ELISA results of purified Rabbit Anti-Mouse IgG Biotin Conjugated Antibody tested against purified Mouse IgG. Each well was coated in duplicate with 1.0 µg of Mouse IgG (green line). The starting dilution of antibody was 5µ g/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using Blocking buffer MB-060-1000, Streptavidin HRP conjugate 1:10,000, and TMB-8000 substrate.
