Target Details

Target:	IgG
Abstract:	IgG Products
Target Type:	Antibody
Background:	<p>Synonyms: Rabbit F(ab')₂ Anti-Guinea Pig IgG Antibody Texas Red™ Conjugation, Rabbit Fab2 Anti-Guinea Pig IgG Texas Red™ Conjugated Antibody</p> <p>Background: F(ab')₂ Anti-Guinea Pig IgG Texas Red Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)₂ fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)₂ fragments penetrate tissue samples and show better antigen recognition and signal generation in IHC. F(ab)₂ fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')₂ Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.</p>
