# Datasheet for ABIN1047515 PTDSS1 Protein (AA 1-35, partial) (GST tag)

1 Image

2 Publications

#### Overview

Quantity:	100 µg	
Target:	PTDSS1	
Protein Characteristics:	AA 1-35, partial	
Origin:	Human	
Source:	Escherichia coli (E. coli)	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This PTDSS1 protein is labelled with GST tag.	
Application:	ELISA	

## Product Details

Sequence:	MASCVGSRTL SKDDVNYKMH FRMINEQQVE DITID
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	90 %

#### Target Details

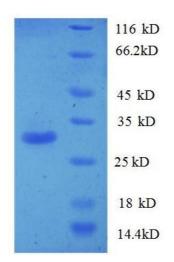

Target:	PTDSS1	
Alternative Name:	Phosphatidylserine synthase 1 protein (PTDSS1 Products)	
Background:	Catalyzes a base-exchange reaction in which the polar head group of phosphatidylcholine is	
	replaced by L-serine.

Molecular Weight:	31.5 kD			
UniProt:	P48651			
Application Details				
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system			
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is			
	of very high-quality and close to the natural protein. But the low expression level, the high cost			
	of medium and the culture conditions restrict the promotion of mammalian cell expression			
	systems. The yeast protein expression system serve as a eukaryotic system integrate the			
	advantages of the mammalian cell expression system. A protein expressed by yeast system			
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the			
	native protein conformation. It can be used to produce protein material with high added value			
	that is very close to the natural protein. Our proteins produced by yeast expression system has			
	been used as raw materials for downstream preparation of monoclonal antibodies.			
Restrictions:	For Research Use only			
Handling				
Format:	Lyophilized			
Concentration:	0.2-2 mg/mL			
Buffer:	Tris-based buffer, 50 % glycerol			
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to			
	one week			
Storage:	-20 °C			
Storage Comment:	Store at -20 °C for extended storage, conserve at -20 °C or -80 °C
