**TMED9 Protein (AA 40-197, partial) (GST tag)**[Go to Product page](#)**1** Image**2** Publications

## Overview

Quantity:	100 µg
Target:	TMED9
Protein Characteristics:	AA 40-197, partial
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This TMED9 protein is labelled with GST tag.
Application:	ELISA

## Product Details

Sequence:	FHIGETEKKC FIEEIPDETM VIGNYRTQLY DKQREEYQPA TPGLGMFVEV KDPEDKVILA RQYGSEGRFT FTSHTPGEHQ ICLHSNSTKF SLFAGGMLRV HLDIQVGEHA NDYAEIAAKD KLSELQLRVR QLVEQVEQIQ KEQNYQRWRE ERFRTQSE
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	90 %

## Target Details

Target:	TMED9
Alternative Name:	Transmembrane emp24 domain-containing protein 9 protein ( <a href="#">TMED9 Products</a> )
Background:	Belongs to the EMP24/GP25L family.

## Target Details

Molecular Weight: 45.9 kD

UniProt: [Q9BVK6](#)

## Application Details

**Comment:** The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

**Restrictions:** For Research Use only

## Handling

**Format:** Lyophilized

**Concentration:** 0.2-2 mg/mL

**Buffer:** Tris-based buffer, 50 % glycerol

**Handling Advice:** Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

**Storage:** -20 °C

**Storage Comment:** Store at -20 °C for extended storage, conserve at -20 °C or -80 °C
