

# Datasheet for ABIN1048661

# anti-KCNJ3 antibody (Internal Region)

Go to Product page

## Overview

| Quantity:            | 50 μg   |
|----------------------|---|
| Target:              | KCNJ3   |
| Binding Specificity: | Internal Region   |
| Reactivity:          | Human, Mouse, Rat, Monkey, Cow, Guinea Pig, Horse, Pig, Hamster   |
| Host:                | Rabbit  |
| Clonality:           | Polyclonal  |
| Conjugate:           | This KCNJ3 antibody is un-conjugated  |
| Application:         | Immunohistochemistry (IHC), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))   |
| Product Details      |   |
|                      |   |
| Brand:               | IHC-plus™   |
| Brand: Immunogen:    | IHC-plus™  Synthetic 16 amino acid peptide from internal region of human KCNJ3. Percent identity with   |

## **Product Details**

| Product Details     |   |
|---------------------|---|
|                     | Chicken, Platypus (94%) Bat (88%) Xenopus, Stickleback (81%).                   |
| Purification:       | Immunoaffinity purified   |
| Target Details      |   |
| Target:             | KCNJ3   |
| Alternative Name:   | KCNJ3 / GIRK1 (KCNJ3 Products)  |
| Background:         | Name/Gene ID: KCNJ3   |
|                     | Subfamily: Potassium channel - inward-rectifying                                |
|                     | Family: Ion Channel   |
|                     |   |
|                     | Synonyms: KCNJ3, GIRK1, Kcnf3, KIR3.1, GIRK-1, HGIRK1, KGA                      |
| Gene ID:            | 3760  |
| Application Details |   |
| Application Notes:  | Approved: IHC, IHC-P (10 - 15 μg/mL)  |
| Comment:            | Target Species of Antibody: Human   |
| Assay Procedure:    | The IHC-pro Immunohistochemistry Protocol                                       |
|                     | Tissue Preparation  |
|                     | Formalin fixation and embedding in paraffin wax                                 |
|                     | Tissue Sectioning   |
|                     | Make 4-µm sections and place on pre-cleaned and charged microscope slides.      |
|                     | Heat in a tissue-drying oven for 45 minutes at 60°C                             |
|                     | Deparaffinization   |
|                     | Wash slides in 3 changes of xylene – 5 minutes each at room temperature.        |
|                     | Rehydration   |
|                     | Wash slides in 3 changes of 100% alcohol – 3 minutes each at room temperature.  |
|                     | Wash slides in 2 changes of 95% alcohol – 3 minutes each at room temperature.   |
|                     | Wash slides in 1 change of 80% alcohol – 3 minutes at room temperature.         |
|                     | Rinse slides in gentle running distilled water – 5 minutes at room temperature. |

#### Antigen retrieval

Steam slides in 0.01 M sodium citrate buffer, pH 6.0 at 99-100°C - 20 minutes

Remove from heat and let stand at room temperature in buffer - 20 minutes

Rinse in 1X TBS with Tween (TBST) – 1 minute at room temperature.

#### **Immunostaining**

Do not allow tissues to dry at any time during the staining procedure.

Apply a universal protein block – 20 minutes at room temperature.

Drain protein block from slides, apply diluted primary antibody – 45 minutes at room temperature.

Rinse slides in 1X TBST - 1 minute at room temperature.

Apply a biotinylated secondary antibody (specific to the host of the primary antibody) - 30 minutes at room temperature.

Rinse slides 1X TBST - 1 minute at room temperature.

Apply alkaline phosphatase streptavidin – 30 minutes at room temperature.

Rinse slides in 1X TBST - 1 minute at room temperature.

Apply alkaline phosphatase chromogen substrate – 30 minutes at room temperature.

Wash slides in distilled water - 1 minute at room temperature.

#### **Dehydrate**

This method should only be used if the chromogen substrate is alcohol insoluble.

Wash slides in 2 changes of 80% alcohol – 1 minute each at room temperature.

Wash slides in 2 changes of 95% alcohol – 1 minute each at room temperature.

Wash slides in 3 changes of 100% alcohol – 1 minute each at room temperature.

Wash slides in 3 changes of xylene – 1 minute each at room temperature.

Apply coverslip

Restrictions:

For Research Use only

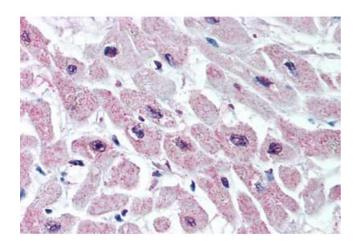

#### Handling

| Format:        | Liquid                             |
|----------------|------------------------------------|
| Concentration: | Lot specific                       |
| Buffer:        | PBS, less than 0.1 % sodium azide. |
| Preservative:  | Sodium azide                       |

## Handling

| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                      |
|--------------------|---|
| Storage:           | 4 °C,-20 °C   |
| Storage Comment:   | Aliquot and store undiluted at -20°C or below for up to 1 year. Can be stored undiluted at 4°C for up to 1 month. Avoid freeze-thaw cycles. |
| Expiry Date:       | 12 months   |
