## Datasheet for ABIN1049327 anti-SGK3 antibody (N-Term)

2 Images

#### Overview

| Quantity:            | 50 µg                                                                                   |
|----------------------|-----------------------------------------------------------------------------------------|
| Target:              | SGK3                                                                                    |
| Binding Specificity: | N-Term                                                                                  |
| Reactivity:          | Human, Monkey                                                                           |
| Host:                | Rabbit                                                                                  |
| Clonality:           | Polyclonal                                                                              |
| Application:         | Immunohistochemistry (IHC), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)) |

## Product Details

| Brand:                | IHC-plus™                                                                                                                                                                                                                             |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| lmmunogen:            | Synthetic 13 amino acid peptide from N-terminus of human SGK3. Percent identity with other species by BLAST analysis: Human, Gorilla, Orangutan, Gibbon, Monkey, Marmoset (100%), Rat (92%), Mouse, Elephant, Dog, Bat, Rabbit (85%). |
|                       | Type of Immunogen: Synthetic peptide                                                                                                                                                                                                  |
| Specificity:          | Human SGK3. BLAST analysis of the peptide immunogen showed no homology with other human proteins.                                                                                                                                     |
| Predicted Reactivity: | Percent identity with other species by BLAST analysis: Human, Gorilla, Orangutan, Gibbon,<br>Monkey, Marmoset (100%) Rat (92%) Mouse, Elephant, Dog, Bat, Rabbit (85%).                                                               |
| Purification:         | Immunoaffinity purified                                                                                                                                                                                                               |

#### Target Details

| Target:             | SGK3                       |
|---------------------|----------------------------|
| Alternative Name:   | SGK3 (SGK3 Products)       |
| Background:         | Name/Gene ID: SGK3         |
|                     | Subfamily: SGK             |
|                     | Family: Protein Kinase     |
|                     |                            |
|                     | Synonyms: SGK3, CISK, SGKL |
| Gene ID:            | 23678                      |
|                     |                            |
| Application Details |                            |

| Application Notes: | Approved: IHC, IHC-P (2.5 µg/mL)          |
|--------------------|-------------------------------------------|
| Comment:           | Target Species of Antibody: Human         |
| Assay Procedure:   | The IHC-pro Immunohistochemistry Protocol |

#### **Tissue Preparation**

Formalin fixation and embedding in paraffin wax

#### **Tissue Sectioning**

Make 4-µm sections and place on pre-cleaned and charged microscope slides. Heat in a tissue-drying oven for 45 minutes at 60°C Deparaffinization Wash slides in 3 changes of xylene – 5 minutes each at room temperature.

#### Rehydration

Wash slides in 3 changes of 100% alcohol – 3 minutes each at room temperature. Wash slides in 2 changes of 95% alcohol – 3 minutes each at room temperature. Wash slides in 1 change of 80% alcohol – 3 minutes at room temperature. Rinse slides in gentle running distilled water – 5 minutes at room temperature.

#### Antigen retrieval

Steam slides in 0.01 M sodium citrate buffer, pH 6.0 at 99-100°C - 20 minutes Remove from heat and let stand at room temperature in buffer - 20 minutes Rinse in 1X TBS with Tween (TBST) – 1 minute at room temperature.

|               | Immunostaining                                                                              |
|---------------|---------------------------------------------------------------------------------------------|
|               | Do not allow tissues to dry at any time during the staining procedure.                      |
|               | Apply a universal protein block – 20 minutes at room temperature.                           |
|               | Drain protein block from slides, apply diluted primary antibody – 45 minutes at room        |
|               | temperature.                                                                                |
|               | Rinse slides in 1X TBST - 1 minute at room temperature.                                     |
|               | Apply a biotinylated secondary antibody (specific to the host of the primary antibody) - 30 |
|               | minutes at room temperature.                                                                |
|               | Rinse slides 1X TBST – 1 minute at room temperature.                                        |
|               | Apply alkaline phosphatase streptavidin – 30 minutes at room temperature.                   |
|               | Rinse slides in 1X TBST - 1 minute at room temperature.                                     |
|               | Apply alkaline phosphatase chromogen substrate – 30 minutes at room temperature.            |
|               | Wash slides in distilled water – 1 minute at room temperature.                              |
|               |                                                                                             |
|               | Dehydrate                                                                                   |
|               | This method should only be used if the chromogen substrate is alcohol insoluble.            |
|               | Wash slides in 2 changes of 80% alcohol – 1 minute each at room temperature.                |
|               | Wash slides in 2 changes of 95% alcohol – 1 minute each at room temperature.                |
|               | Wash slides in 3 changes of 100% alcohol – 1 minute each at room temperature.               |
|               | Wash slides in 3 changes of xylene – 1 minute each at room temperature.                     |
|               | Apply coverslip                                                                             |
| Restrictions: | For Research Use only                                                                       |

### Handling

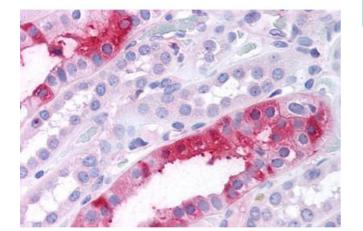

| Format:            | Liquid                                                                                                                 |
|--------------------|------------------------------------------------------------------------------------------------------------------------|
| Concentration:     | Lot specific                                                                                                           |
| Buffer:            | PBS, less than 0.1 % sodium azide.                                                                                     |
| Preservative:      | Sodium azide                                                                                                           |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only. |
| Storage:           | 4 °C,-20 °C                                                                                                            |
| Storage Comment:   | Aliquot and store undiluted at -20°C or below for up to 1 year. Can be stored undiluted at 4°C for                     |
|                    |                                                                                                                        |
