

# Datasheet for ABIN1049509

# anti-SH3G2 antibody (Internal Region)

#### Overview

| Quantity:            | 100 μg                                                   |
|----------------------|----------------------------------------------------------|
| Target:              | SH3G2                                                    |
| Binding Specificity: | Internal Region                                          |
| Reactivity:          | Human                                                    |
| Host:                | Goat                                                     |
| Clonality:           | Polyclonal                                               |
| Application:         | Western Blotting (WB), ELISA, Immunohistochemistry (IHC) |

## **Product Details**

| Purpose:          | Endophilin-A1 / SH3GL2                                                                                                                |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Immunogen:        | Peptide with sequence C-SLEFPTGDSTQPN, from the of the protein sequence according to NP_003017.1.                                     |
| Sequence:         | SLEFPTGDST QPN                                                                                                                        |
| Isotype:          | IgG                                                                                                                                   |
| Cross-Reactivity: | Human, Pig                                                                                                                            |
| Purification:     | Purified from goat serum by ammonium sulphate precipitation followed by antigen affinity chromatography using the immunizing peptide. |
| Grade:            | Verified                                                                                                                              |

# Target Details

| rarget Details      |                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:             | SH3G2                                                                                                                                                                                                                                                                                                                                                                                                            |
| Alternative Name:   | SH3GL2 (SH3G2 Products)                                                                                                                                                                                                                                                                                                                                                                                          |

| Pathways:           | Neurotrophin Signaling Pathway, EGFR Downregulation                                                                                                                                                                                                                                                                                                                                                              |
| Application Details |                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Application Notes:  | Immunohistochemistry: In paraffin embedded Human Cerebral Cortex shows staining of cytoplasm in some but not all neuronal cells. Recommended concentration, 5-10 µg/mL. Western Blot: Approx 38 kDa band observed in Human Brain (Frontal Cortex) lysates (calculate MW of 40.0 kDa according to NP_003017.1). Recommended concentration: 0.3-1 µg/mL. Peptide ELISA: antibody detection limit dilution 1:64000. |
| Restrictions:       | For Research Use only                                                                                                                                                                                                                                                                                                                                                                                            |
| Handling            |                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Format:             | Liquid                                                                                                                                                                                                                                                                                                                                                                                                           |
| Concentration:      | 0.5 mg/mL                                                                                                                                                                                                                                                                                                                                                                                                        |
| Buffer:             | Supplied at 0.5 mg/mL in Tris saline, 0.02 % sodium azide, pH 7.3 with 0.5 % bovine serum albumin.                                                                                                                                                                                                                                                                                                               |
| Preservative:       | Sodium azide                                                                                                                                                                                                                                                                                                                                                                                                     |
| Precaution of Use:  | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                                                                                                                                                                                                                                                                                           |
| Handling Advice:    | Minimize freezing and thawing.                                                                                                                                                                                                                                                                                                                                                                                   |
| Storage:            | -20 °C                                                                                                                                                                                                                                                                                                                                                                                                           |
| Storage Comment:    | Aliquot and store at -20°C, with minimal freeze/thawing. A working aliquot may be refrigerated at 4°C for a few weeks and still remain viable.                                                                                                                                                                                                                                                                   |
