## Datasheet for ABIN1095478 ANXA6 Protein (AA 2-245, partial) (GST tag)

1 Image

4 Publications

#### Overview

| Quantity:                     | 100 µg   |
|-------------------------------|--|
| Target:                       | ANXA6  |
| Protein Characteristics:      | AA 2-245, partial  |
| Origin:                       | Human  |
| Source:                       | Escherichia coli (E. coli)   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This ANXA6 protein is labelled with GST tag.   |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | AKPAQGAKYR GSIHDFPGFD PNQDAEALYT AMKGFGSDKE AILDIITSRS NRQRQEVCQS                                |

|                               | RTNEQMHQLV AAYKDAYERD LEADIIGDTS GHFQKMLVVL LQGTREEDDV VSEDLVQQDV                                |
|                               | QDLYEAGELK WGTDEAQFIY ILGNRSKQHL RLVFDEYLKT TGKPIEASIR GELSGDFEKL                                |
|                               | MLAVVKCIR  |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien |
|                               | cells or by baculovirus infection. Be aware about differences in price and lead time.            |
| Purity:                       | 90 %   |
|                               |  |
| Target Details                |  |
| Target:                       | ANXA6  |
|                               |  |

| Target Details    |  |
|-------------------|--|
| Alternative Name: | Annexin A6 protein (ANXA6 Products)  |
| Background:       | May associate with CD21. May regulate the release of Ca2+ from intracellular stores. |
| Molecular Weight: | 55.4 kD  |
| UniProt:          | P08133   |

## Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|----------|--|
|          | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|          | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|          | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|          | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|          | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|          | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|          | native protein conformation. It can be used to produce protein material with high added value      |
|          | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|          | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
|          |  |

Restrictions:

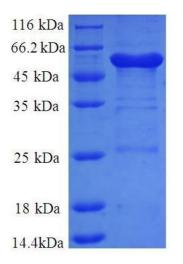

For Research Use only

### Handling

| Format:           | Lyophilized   |
|-------------------|---|
| Concentration:    | 0.2-2 mg/mL   |
| Buffer:           | Tris-based buffer, 50 % glycerol  |
| Handling Advice:  | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:          | -20 °C  |
| Storage Comment:  | Store at -20 °C for extended storage, conserve at -20 °C or -80 °C                                  |
