

Datasheet for ABIN110559
anti-IL-15 antibody (AA 104-161)

[Go to Product page](#)

Overview

Quantity:	0.2 mg
Target:	IL-15 (IL15)
Binding Specificity:	AA 104-161
Reactivity:	Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This IL-15 antibody is un-conjugated
Application:	Western Blotting (WB)

Product Details

Target Details

Target:	IL-15 (IL15)
Alternative Name:	IL-15 (IL15 Products)
Background:	IL-15 is 14-15 kDa, a member of the four alpha-helical bundle family of cyto kines. It is very similar to IL-2, except that IL-15 has a IL-15 alpha receptor subunit 1. It play an important role in the growth and differentiation of T and B lymphocytes, natural killer cells, macrophages, and monocytes as well as it activates a number of importatnat intracellular signaling molecules 2. This implies that IL-15 could be essential for the immune responses, allograft rejection, and the pathogenesis of autoimmune d iseases 3.
Pathways:	JAK-STAT Signaling , Glycosaminoglycan Metabolic Process

Application Details

Restrictions: For Research Use only

Handling

Format: Lyophilized

Storage: 4 °C
