Target Details

Alternative Name:	CRISP3 (CRISP3 Products)
Background:	Cysteine-rich secretory protein 3 (CRISP-3, also known as SGP28) is a glycoprotein that belongs to the family of cysteine-rich secretory proteins (CRISPs) which was originally discovered in human neutrophilic granulocytes. CRISP-3 is also widely distibuted in exocrine glands (salivary glands, pancreas and prostate), eosinophilic granulocytes and to a lower level in epididymis, ovary, thymus and colon. The presence of CRISP-3 in neutrophils, eosinophils and in exocrine secretions indicates a role in innate host defense.Synonyms: CRISP-3, Cysteine-rich secretory protein 3, SGP28, Specific granule protein of 28 kDa
