

## Datasheet for ABIN1133328 **Fibromodulin ELISA Kit**

[Go to Product page](#)

### Overview

Quantity: 96 tests

Target: Fibromodulin (FMOD)

Reactivity: Chicken

Application: ELISA

### Product Details

Detection Method: Colorimetric

Characteristics: Gallus gallus,Chicken,Fibromodulin,FM,Keratan sulfate proteoglycan fibromodulin,KSPG fibromodulin,FMOD

Components: Reagent (Quantity): Assay plate (1), Standard (2), Sample Diluent (1x20ml), Assay Diluent A (1x10ml), Assay Diluent B (1x10ml), Detection Reagent A (1x120µl), Detection Reagent B (1x120µl), Wash Buffer(25 x concentrate) (1x30ml), Substrate (1x10ml), Stop Solution (1x10ml)

### Target Details

Target: Fibromodulin (FMOD)

Alternative Name: FMOD ([FMOD Products](#))

Background: Synonyms: Chicken,Fibromodulin,FM,FMOD,Gallus gallus,Keratan sulfate proteoglycan fibromodulin,KSPG fibromodulin

Pathways: [Glycosaminoglycan Metabolic Process](#)

### Application Details

|                |                       |
|----------------|-----------------------|
| Comment:       | Gene Name: FMOD       |
| Sample Volume: | 100 µL                |
| Plate:         | Pre-coated            |
| Restrictions:  | For Research Use only |

### Handling

|                  |                                                                                                                                                                              |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage:         | 4 °C/-20 °C                                                                                                                                                                  |
| Storage Comment: | The Standard, Detection Reagent A, Detection Reagent B and the 96-well strip plate should be stored at -20 °C upon being received. The other reagents can be stored at 4 °C. |
