

## Datasheet for ABIN1148341

### PTAFR ELISA Kit

[Go to Product page](#)

#### Overview

|              |          |
|--------------|----------|
| Quantity:    | 96 tests |
| Target:      | PTAFR    |
| Reactivity:  | Pig      |
| Application: | ELISA    |

#### Product Details

|                   |                                                                                                                                                                                                                                                                                  |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Detection Method: | Colorimetric                                                                                                                                                                                                                                                                     |
| Characteristics:  | Sus scrofa,Pig,Platelet-activating factor receptor,PAF-R,PAFr,PTAFR,PAFR                                                                                                                                                                                                         |
| Components:       | Reagent (Quantity): Assay plate (1), Standard (2), Sample Diluent (1x20ml), Assay Diluent A (1x10ml), Assay Diluent B (1x10ml), Detection Reagent A (1x120µl), Detection Reagent B (1x120µl), Wash Buffer(25 x concentrate) (1x30ml), Substrate (1x10ml), Stop Solution (1x10ml) |

#### Target Details

|                   |                                                                                                                          |
|-------------------|--------------------------------------------------------------------------------------------------------------------------|
| Target:           | PTAFR                                                                                                                    |
| Alternative Name: | Platelet-activating factor receptor ( <a href="#">PTAFR Products</a> )                                                   |
| Background:       | Synonyms: PAFr,PAFR,PAF-R,Pig,Platelet-activating factor receptor,PTAFR,Sus scrofa                                       |
| Pathways:         | <a href="#">Activation of Innate immune Response</a> , <a href="#">Cellular Response to Molecule of Bacterial Origin</a> |

#### Application Details

|                |                  |
|----------------|------------------|
| Comment:       | Gene Name: PTAFR |
| Sample Volume: | 100 µL           |

Application Details

|               |                       |
|---------------|-----------------------|
| Plate:        | Pre-coated            |
| Restrictions: | For Research Use only |

Handling

|                  |                                                                                                                                                                              |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage:         | 4 °C/-20 °C                                                                                                                                                                  |
| Storage Comment: | The Standard, Detection Reagent A, Detection Reagent B and the 96-well strip plate should be stored at -20 °C upon being received. The other reagents can be stored at 4 °C. |
