anti-SHBG antibody (AA 222-358)

Images

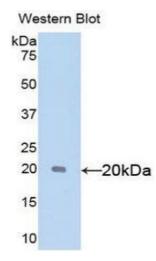

\sim					
	1//6	r	V I	Θ	Λ

Quantity:	100 μL	
Target:	SHBG	
Binding Specificity:	AA 222-358	
Reactivity:	Rat	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This SHBG antibody is un-conjugated	
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC)	
Product Details		
Immunogen:	SHBG (Leu222-Ser358)	
Isotype:	IgG	
Specificity:	The antibody is a rabbit polyclonal antibody raised against SHBG. It has been selected for its ability to recognize SHBG in immunohistochemical staining and western blotting.	
Purification:	Antigen-specific affinity chromatography	
Target Details		
Target:	SHBG	
Abstract:	SHBG Products	
Background:	Alternative Names: ABP, TEBG, SBP, Sex steroid-binding protein, Testis-specific androgen-	

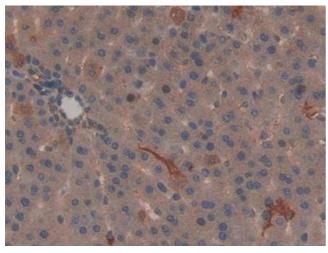

Target Details

Pathways: Hormone Transport Application Details Application Notes: • Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochem paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optin working dilutions must be determined by end user. Comment: The thermal stability is described by the loss rate. The loss rate was determined by acc thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvic degradation and precipitation were observed. The loss rate is less than 5% within the endate under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or infaled, contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition			
Application Details Application Notes: - Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochem paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optin working dilutions must be determined by end user. Comment: - The thermal stability is described by the loss rate. The loss rate was determined by acc thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvid degradation and precipitation were observed. The loss rate is less than 5% within the edate under appropriate storage condition. Restrictions: - For Research Use only Handling Format: - Liquid - Concentration: - Lot specific - Buffer: - PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: - Sodium azide - WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inflavoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: - Avoid repeated freeze-thaw cycles. Storage: - 4 °C - Storage Comment: - Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.		binding protein, Testosterone-estradiol-binding globulin, Testosterone-estrogen-binding globulin	
Application Notes: - Western blotting: 1:50-400 Immunocytochemistry in formalin fixed cells: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochem paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optim working dilutions must be determined by end user. Comment: - The thermal stability is described by the loss rate. The loss rate was determined by acc thermal degradation test, that is, incubate the protein at 378 degC for 48h, and no obvic degradation and precipitation were observed. The loss rate is less than 5% within the edate under appropriate storage condition. Restrictions: - For Research Use only - Format: - Liquid - Concentration: - Lot specific - PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. - Preservative: - Sodium azide - Precaution of Use: - WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or in Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: - Avoid repeated freeze-thaw cycles. - Storage: - Storage Comment: - Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Pathways:	Hormone Transport

Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Application Details		
thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvice degradation and precipitation were observed. The loss rate is less than 5% within the endate under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or into Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Application Notes:	Immunohistochemistry in formalin fixed frozen section: 1:50-500 Immunohistochemistry in paraffin section: 1:10-100 Enzyme-linked Immunosorbent Assay: 1:100-1:5000 Optimal	
Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or interpretation of Use: Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Comment:	The thermal stability is described by the loss rate. The loss rate was determined by accelerated thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition.	
Format: Liquid Concentration: Lot specific Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inl Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Restrictions:	For Research Use only	
Concentration: Lot specific PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inless Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Handling		
Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Preservative: Sodium azide Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or information and contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Format:	Liquid	
Preservative: Sodium azide WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or information of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or information avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Concentration:	Lot specific	
Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or information Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Buffer:	PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol.	
Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. It eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact physician immediately. Sodium azide yields toxic hydrazoic acid under acidic condition azide-containing compounds in running water before discarding to avoid accumulation potentially explosive deposits in lead or copper plumbing. Handling Advice: Avoid repeated freeze-thaw cycles. Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Preservative:	Sodium azide	
Storage: 4 °C Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Precaution of Use:	WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide-containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.	
Storage Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	Handling Advice:	Avoid repeated freeze-thaw cycles.	
	Storage:	4 °C	
Expiry Date: 12 months	Storage Comment:	ige Comment: Store at 2-8 °C for one month. Aliquot and store at -80 °C for 12 months.	
	Expiry Date:	12 months
