anti-COL7A1 antibody (Biotin)

Go to Product page

_				
()	ve.	rv/	101	Λ

Quantity:	200 μL	
Target:	COL7A1	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This COL7A1 antibody is conjugated to Biotin	
Application:	Western Blotting (WB), Immunohistochemistry (IHC), Immunocytochemistry (ICC)	
Product Details		
Purpose:	Biotin-Linked Polyclonal Antibody to Collagen Type VII (COL7)	
Immunogen:	The antibody is a rabbit polyclonal antibody raised against COL7 conjugated to biotin.	
Isotype:	IgG	
Specificity:	The antibody is a rabbit polyclonal antibody raised against COL7. It has been selected for its ability to recognize COL7 in immunohistochemical staining and western blotting.	
Cross-Reactivity:	Mouse	
Purification:	Antigen-specific affinity chromatography followed by Protein A affinity chromatography	
Target Details		
Target:	COL7A1	
Alternative Name:	Collagen Type VII (COL7A1 Products)	

Target Details Background: COL7-A1, COL7A1, EBD1, EBDCT, EBR1, Long-chain collagen, Epidermolysis Bullosa, Dystrophic, Dominant And Recessive, Collagen Alpha-1(VII) chain **Application Details** Western blotting: 0.2-2 µg/mL,1:250-2500 Immunohistochemistry: 5-20 µg/mL,1:25-100 **Application Notes:** Immunocytochemistry: 5-20 µg/mL,1:25-100 Optimal working dilutions must be determined by end user. The thermal stability is described by the loss rate. The loss rate was determined by accelerated Comment: thermal degradation test, that is, incubate the protein at 37°C for 48h, and no obvious degradation and precipitation were observed. The loss rate is less than 5% within the expiration date under appropriate storage condition. Restrictions: For Research Use only Handling Format: Liquid Concentration: 500 μg/mL Buffer: PBS, pH 7.4, containing 0.02 % Sodium azide, 50 % glycerol. Sodium azide Preservative: Precaution of Use: WARNING: Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute

detectable loss of activity. Avoid repeated freeze-thaw cycles.

potentially explosive deposits in lead or copper plumbing.

Avoid repeated freeze/thaw cycles

4 °C,-20 °C

12 months

Handling Advice:

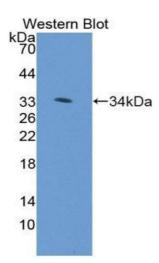

Storage Comment:

Storage:

Expiry Date:

azide-containing compounds in running water before discarding to avoid accumulation of

Store at 4°C for frequent use. Stored at -20°C in a manual defrost freezer for two year without

Western Blotting
