**anti-eIF4EBP1 antibody (pThr69) (PE)**[Go to Product page](#)**2** Publications

## Overview

|                      |                                            |
|----------------------|--------------------------------------------|
| Quantity:            | 50 tests                                   |
| Target:              | eIF4EBP1 (EIF4EBP1)                        |
| Binding Specificity: | pThr69                                     |
| Reactivity:          | Human                                      |
| Host:                | Mouse                                      |
| Clonality:           | Monoclonal                                 |
| Conjugate:           | This eIF4EBP1 antibody is conjugated to PE |
| Application:         | Intracellular Staining (ICS)               |

## Product Details

|               |                                                                                                             |
|---------------|-------------------------------------------------------------------------------------------------------------|
| Brand:        | BD Phosflow™                                                                                                |
| Immunogen:    | Phosphorylated Human 4EBP1 (pT69) Peptide                                                                   |
| Clone:        | M34-273                                                                                                     |
| Isotype:      | IgG1 kappa                                                                                                  |
| Purification: | The monoclonal antibody was purified from tissue culture supernatant or ascites by affinity chromatography. |

## Target Details

|                   |                                             |
|-------------------|---------------------------------------------|
| Target:           | eIF4EBP1 (EIF4EBP1)                         |
| Alternative Name: | 4EBP1 ( <a href="#">EIF4EBP1 Products</a> ) |

## Target Details

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Background: | <p>The eukaryotic translation initiation factor 4E-Binding Protein 1 (4EBP1) is a phosphorylated heat- and acid-stable protein (PHAS-I or PHAS-1), and it is regulated by insulin. It is a member of the eIF4E-Binding Protein Family, which also includes the proteins 4EBP2 and 4EBP3. 4EBP1 binds with eukaryotic translation Initiation Factor 4E (eIF4E), which prevents its assembly into the eIF4E complex and inhibits cap-dependent translation. When 4EBP1 is phosphorylated, this binding is disrupted, allowing cap-dependent translation to be activated. Phosphorylation of 4EBP1 is required for protein synthesis, and it mediates the regulation of protein translation by stimuli that signal through the phosphoinositide 3 (PI3) kinase pathway. We found that threonine 69 (T69) is phosphorylated in resting human peripheral blood monocytes, but it is almost undetectable in resting lymphocytes. PI3 kinase inhibitors, such as LY294002 down-regulate the phosphorylation level of 4EBP1 (pT69) in monocytes. The M34-273 monoclonal antibody recognizes the phosphorylated T69 of activated human 4EBP1.</p> <p>Synonyms: 4E-BP1, EIF4EBP1, P/OKCL.6, PHAS-I, PHAS-1</p> |

## Application Details

|                    |                                                                                                                                                                     |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Notes: | Either BD Cytotfix™ fixation buffer or BD Phosflow™ Fix Buffer I may be used for cell fixation. Any of the three BD Phosflow™ permeabilization buffers may be used. |
| Sample Volume:     | 20 µL                                                                                                                                                               |
| Restrictions:      | For Research Use only                                                                                                                                               |

## Handling

|                    |                                                                                                                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                                                                                                    |
| Buffer:            | Aqueous buffered solution containing BSA and ≤0.09 % sodium azide.                                                                                                                                        |
| Preservative:      | Sodium azide                                                                                                                                                                                              |
| Precaution of Use: | This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                                                                                    |
| Storage:           | 4 °C                                                                                                                                                                                                      |
| Storage Comment:   | The antibody was conjugated with R-PE under optimum conditions, and unconjugated antibody and free PE were removed. Store undiluted at 4°C and protected from prolonged exposure to light. Do not freeze. |
