Target Details

Target:	CD72.1
Abstract:	CD72.1 Products
Background:	CD72.1/Lyb-2.1, a type II integral membrane glycoprotein and a member of the C-lectin family

Target Details

of cell surface receptors, is a differentiation antigen of B cells, and is found in mouse strains expressing the Lyb-2.1 allotype. CD72.1 is the ligand of CD5 (Ly-1) which is distributed on all T cells and a small number of B cells. The 10-1.D.2 monoclonal antibody blocks binding of CD5 to CD72 on the B cell surface, which leads to inhibition of the positive signal resulting from CD5/CD72 pairing.
