Target Details

Target:	Sca-1/Ly-6A/E (Ly6a)
Alternative Name:	Ly-6A/E (Ly6a Products)
Background:	Ly-6A/E, also known as Sca-1, is a member of the Ly-6 multigene family of type V
	glycophosphatidylinositol-anchored cell surface proteins. It is expressed on multipotent

hematopoietic stem cells in bone marrow of mice with both the Ly-6.1 and Ly-6.2 allotypes. In the periphery, Ly-6A/E exhibits a pattern of expression which is based on differences between the two allotypes. Ly-6.1 strains (e.g., A, BALB/c, CBA, C3H/He, DBA/1, NZB) have few Ly-6A/E+ resting peripheral lymphocytes, whereas Ly-6.2 strains (e.g., AKR, C57BL, C57BR, C57L, DBA/2, PL, SJL, SWR, 129) have relatively high numbers of Ly-6A/E+ lymphocytes. The expression of Ly-6A/E is dramatically upregulated in all strains upon cellular activation.

Pathways:

Sensory Perception of Sound, Activated T Cell Proliferation
