Datasheet for ABIN135360 anti-CD24 antibody (PE)

Image

#### Overview

Quantity:	0.1 mg
Target:	CD24
Reactivity:	Mouse
Host:	Rat
Clonality:	Monoclonal
Conjugate:	This CD24 antibody is conjugated to PE
Application:	Flow Cytometry (FACS)

### Product Details

Immunogen:	Mouse thymus or spleen
Clone:	30-F1
lsotype:	lgG2c
Specificity:	Mouse CD24, Mr 35-45 kDa
Characteristics:	Rat Anti-Mouse CD24-PE

### Target Details

Target:	CD24
Alternative Name:	CD24 (CD24 Products)
Background:	CD24 is expressed in B cells until their terminal differentiation into plasma cells. It has been
	used widely as a marker to fractionate different B-lineage differentiation stages. CD24 has been

found on a variety of other hematopoietic and neural cell types, and is now classified as a
costimulatory molecule. The CD24/HSA molecule is composed mostly of carbohydrate, with a
protein core of only 31-35 amino acids in the human and 27 AA in the mouse. The molecular
mass is variable, ranging from 38-70 kDa. CD24 is now included in the large group of
phosphatidylinositol-anchored membrane proteins. Studies with purified CD24 applied to latex
beads have demonstrated a self-binding property, suggesting that the molecule is capable of
promoting homotypic aggregation, binding and cell adhesion. This is supported by earlier
observations of the blockade of B cell lymphoblast aggregation with anti-CD24 monoclonal
antibody. Recent studies of murine CD24 have assigned a role for CD24/HSA as a ligand for P-
selectin, a calcium-dependent lectin.

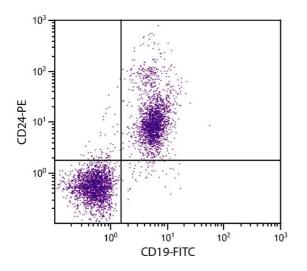

Pathways:

Regulation of Leukocyte Mediated Immunity, Positive Regulation of Immune Effector Process, Activated T Cell Proliferation

## Application Details

Application Notes:	<ul> <li>Applications: FC - Quality tested</li> <li>Working Dilutions: Flow Cytometry FITC and BIOT conjugates 2 g/106 cells PE, APC, and SPRD conjugates 0.2 g/106 cells For flow cytometry, the suggested use of these reagents is in a final volume of 100 L</li> </ul>
Sample Volume:	1 mL
Restrictions:	For Research Use only
Handling	
Concentration:	0.1 mg/mL
Buffer:	0.1 mg in 1.0 mL or 0.2 mg in 2.0 mL of PBS/Sodium azide and a stabilizing agent
Preservative:	Sodium azide
Precaution of Use:	This product contains Sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.
Handling Advice:	<b>Do not freeze!</b> <b>Protect conjugated products from light.</b> Each reagent is stable for the period shown on the bottle label if stored as directed.
Storage:	4 °C
Storage Comment:	Store at 2-8°C
