	with the invariant 2-microglobulin. These antigens are expressed on most nucleated cells but
	expression varies on different cell types. MHC Class I molecules present endogenously
	synthesized peptides to CD8+ T lymphocytes, which are usually cytotoxic T cells.5 MHC Class I
	antigens expressed on thymic epithelial cells regulate the positive and negative selection of
	CD8+ T cells during T cell ontogeny.
Pathways:	Regulation of Leukocyte Mediated Immunity, Positive Regulation of Immune Effector Process
