Datasheet for ABIN1385443 anti-TEFM antibody (AA 60-110)

Image

Overview

Quantity:	100 µL
Target:	TEFM
Binding Specificity:	AA 60-110
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This TEFM antibody is un-conjugated
Application:	Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human C17orf42
lsotype:	lgG
Cross-Reactivity:	Human, Mouse, Rat
Purification:	Purified by Protein A.

Target Details

Target:	TEFM
Alternative Name:	C17orf42 (TEFM Products)
Background:	Synonyms: Chromosome 17 open reading frame 42, FLJ22729, Hypothetical protein

	LOC79736, MGC24674, UPF0629 protein C17orf42, TEFM_HUMAN, TEFM, transcription
	elongation factor, mitochondrial,
	Background: C17orf42 is a 360 amino acid protein that exists as two alternatively spliced
	isoforms and is encoded by a gene mapping to human chromosome 17. Chromosome 17
	makes up over 2.5 % of the human genome with about 81 million bases encoding over 1,200
	genes. Two key tumor suppressor genes are associated with chromosome 17, namely, p53 and
	BRCA1. Tumor suppressor p53 is necessary for maintenance of cellular genetic integrity by
	moderating cell fate through DNA repair versus cell death. Malfunction or loss of p53
	expression is associated with malignant cell growth and Li-Fraumeni syndrome. Like p53,
	BRCA1 is directly involved in DNA repair, specifically it is recognized as a genetic determinant of
	early onset breast cancer and predisposition to cancers of the ovary, colon, prostate gland and
	fallopian tubes. Chromosome 17 is also linked to neurofibromatosis, a condition characterized
	by neural and epidermal lesions, and dysregulated Schwann cell growth. Alexander disease,
	Birt-Hogg-Dube syndrome and Canavan disease are also associated with chromosome 17.
Gene ID:	79736
UniProt:	Q96QE5
Application Details	
Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
	IF(IHC-P) 1:50-200
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	0.01M TBS(pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	4 °C,-20 °C
Storage Comment:	Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.
