Target Details

Background:	<p>Synonyms: Lysosomal thioesterase PPT2, Palmitoyl protein hydrolase 2, Palmitoyl protein thioesterase 2, PPT 2, PPT-2, Ppt2, PPT2_HUMAN, S thioesterase G14, S-thioesterase G14.</p> <p>Background: PPT2 (palmitoyl-protein thioesterase 2), also known as G14, is a 302 amino acid glycosylated protein that localizes to the lysosome and belongs to the palmitoyl-protein thioesterase family. Expressed throughout the body with highest levels in skeletal muscle, PPT2 functions to remove thioester-linked fatty acyl groups from a variety of substrates, including S-palmitoyl-CoA, thereby playing an important role in lipid metabolism. PPT2 operates at an optimal pH of 7 and exhibits the highest activity for the acyl groups on myristic and palmitic acids, with lower levels of activity toward other short- and long-chain acyl substrates. PPT2 exists as two isoforms, one of which is expressed at low levels and is catalytically inactive.</p>
