antibodies

# Datasheet for ABIN1385803 anti-Hippocalcin antibody (AA 101-193)

Overview

Quantity:	100 µL
Target:	Hippocalcin (HPCA)
Binding Specificity:	AA 101-193
Reactivity:	Mouse
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Hippocalcin antibody is un-conjugated
Application:	Western Blotting (WB), ELISA, Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)), Immunohistochemistry (Paraffin- embedded Sections) (IHC (p)), Immunocytochemistry (ICC), Immunohistochemistry (Frozen Sections) (IHC (fro))

#### Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human Hippocalcin
lsotype:	lgG
Cross-Reactivity:	Mouse
Predicted Reactivity:	Human,Rat,Cow,Chicken,Rabbit
Purification:	Purified by Protein A.
Target Details	

Target:

Hippocalcin (HPCA)

Target Details	
Alternative Name:	Hippocalcin (HPCA Products)
Background:	Synonyms: BDR 2, BDR2, Calcium binding protein BDR 2, Calcium binding protein BDR2,
	Calcium-binding protein BDR-2, Hpca, HPCA_HUMAN, Neuron specic calcium binding protein
	hippocalcin, Neuron specic calcium-binding protein hippocalcin, Neuron-specic calcium-binding
	protein hippocalcin,P23K.
	Background: Hippocalcin is a neuron-specific calcium-binding protein found primarily in the
	plasma membrane of brain and retinal tissue, with increased expression observed in
	hippocampal pyramidal cells. Through its calcium-dependent signal regulation, hippocalcin can
	both inhibit rhodopsin kinase and increase phospholipase D2 expression. In order to regulate
	kinase and phospholipase activity, hippocalcin must bind to the plasma membrane where it can
	then bind two calcium ions for use in signal regulation. The hippocalcin protein is highly
	conserved in mouse, rat and human tissue and has a suggested role in neural plasticity and
	associative memory by contributing to the survival of neurons during aging. The loss of
	hippocalcin expression is thought to contribute to age-related impairment of post-synaptic
	functions related to neuronal degradation.

## Application Details

Application Notes:	WB 1:300-5000
	ELISA 1:500-1000
	IHC-P 1:200-400
	IHC-F 1:100-500
	IF(IHC-P) 1:50-200
	IF(IHC-F) 1:50-200
	IF(ICC) 1:50-200
	ICC 1:100-500
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Concentration:	1 µg/µL
Buffer:	0.01M TBS( pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be
