# anti-ELL antibody (AA 531-620)

Go to Product page

$\sim$					
()	VE	۲۱	/1	$\triangle$	Λ

Quantity:	100 μL
Target:	ELL
Binding Specificity:	AA 531-620
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This ELL antibody is un-conjugated
Application:	ELISA, Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffinembedded Sections) (IF (p)), Immunohistochemistry (Paraffinembedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

### **Product Details**

Target:

Alternative Name:

ELL

**ELL (ELL Products)** 

Immunogen:	KLH conjugated synthetic peptide derived from human ELL
iriiriuriogeri.	KEIT CONJUGATED SYNTHETIC PEPTIDE DERIVED HONTHUMAN ELL
Isotype:	IgG
Predicted Reactivity:	Human,Mouse,Rat,Dog,Cow,Horse
Purification:	Purified by Protein A.
Target Details	

#### **Target Details**

#### Background:

Synonyms: ELL\_HUMAN, Eleven nineteen lysine rich leukemia gene, Eleven-nineteen lysine-rich leukemia protein, ELL1, elongation factor RNA polymerase II, Men, RNA polymerase II elongation factor ELL.

Background: Eukaryotic RNA polymerase II mediates the synthesis of mature and functional messenger RNA. This is a multistep process, called the transcription cycle, that includes five stages: preinitiation, promoter, clearance, elongation and termination. Elongation is thought to be a critical stage for the regulation of gene expression. ELL (11-19 lysine-rich leukemia protein), also designated MEN, functions as an RNA polymerase II elongation factor that increases the rate of transcription by suppressing transient pausing by RNA polymerase II. It is also thought to regulate cellular proliferation. ELL is abundantly expressed in peripheral blood leukocytes, skeletal muscle, placenta and testis, with lower expression in spleen, thymus, heart, brain, lung, kidney, liver and ovary. The gene encoding human ELL, which maps to chromosome 19p13.1, is one of several genes that undergo translocation with the MLL gene on chromosome 11q23 in acute myeloid leukemia. MLL (myeloid/lymphoid leukemia, also designated ALL-1 and HRX) regulates embryonal and hematopoietic development.

Gene ID:

8178

## **Application Details**

IHC-P 1:200-400

IHC-F 1:100-500

IF(IHC-P) 1:50-200

IF(IHC-F) 1:50-200

IF(ICC) 1:50-200

Restrictions:

For Research Use only

#### Handling

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	0.01M TBS( pH 7.4) with 1 % BSA, 0.02 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

# Handling

Storage:	4 °C,-20 °C
Storage Comment: Shipped at 4°C. Store at -20°C for one year. Avoid repeated freeze/thaw cycles.	
Expiry Date:	12 months
