Alternative Name:	SCGN/Secretagogin (SCGN Products)
Background:	Synonyms: Calbindin like, CALBL, DJ501N12.8, Scgn, SECRET, Secretagogin, Secretagogin EF
	hand calcium binding protein, SEGN, SEGN_HUMAN, Setagin.
	Background: SCGN is a 276 amino acid cytoplasmic protein that contains six EF-hand domains
	and is related to the calicium-binding proteins Calretinin and Calbindin D28K. Expressed in a
	variety of tissues including stomach, thyroid, colon, brain and neuroendocrine cells, SCGN is
	thought to be involved in cell proliferation and KCI (potassium chloride)-mediated calcium flux
	events. Through its interaction with KCl and its subsequent ability to modulate calcium storage
	pools within the cell, SCGN may function to negatively control growth and differentiation rates
	and, thus, indirectly inhibit cell replication.
