antibodies

## Datasheet for ABIN1391571 anti-TOR1A antibody (AA 56-130) (Alexa Fluor 350)

Overview

| Quantity:            | 100 μL   |  |
|----------------------|--|--|
| Target:              | TOR1A  |  |
| Binding Specificity: | AA 56-130  |  |
| Reactivity:          | Human  |  |
| Host:                | Rabbit   |  |
| Clonality:           | Polyclonal   |  |
| Conjugate:           | This TOR1A antibody is conjugated to Alexa Fluor 350   |  |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |  |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human Torsin A |  |
|-----------------------|--|--|
| Isotype:              | lgG  |  |
| Cross-Reactivity:     | Human  |  |
| Predicted Reactivity: | Mouse,Rat,Dog,Cow,Pig  |  |
| Purification:         | Purified by Protein A.                                       |  |
| Target Details        |  |  |
| Target:               | TOR1A  |  |

| rarget.           | IORTA                     |
|-------------------|---------------------------|
| Alternative Name: | Torsin A (TOR1A Products) |

| Target Details      |  |  |
|---------------------|--|--|
| Background:         | Synonyms: DQ2, Dystonia 1, Dystonia 1 protein, Dyt1, Tor1a, Torsin A, Torsin family 1 member                       |  |
|                     | A, TOR1A_HUMAN.  |  |
|                     | Background: A mutation of the DYT1 gene, which codes for TorsinA, has been identified as the                       |  |
|                     | cause of one form of autosomal dominantly inherited dystonia. Early-onset torsion dystonia is a                    |  |
|                     | movement disorder, characterized by twisting muscle contractures, that begins in childhood.                        |  |
|                     | Symptoms are believed to result from altered neuronal communication in the basal ganglia.                          |  |
|                     | TorsinA comprises 332 amino acids. TorsinA is widely expressed throughout the mouse centra                         |  |
|                     | nervous system and is detected in the majority of neurons in nearly all regions. The proteins                      |  |
|                     | display cytoplasmic distribution, although in some types of neurons localization is perinuclear.                   |  |
|                     | TorsinA often performs chaperone-like functions that assist in the assembly, operation, or dis-                    |  |
|                     | assembly of protein complexes. The gene which encodes TorsinA has high homology to three                           |  |
|                     | additional mammalian genes and a nematode gene and distal similarity to the family of heat-                        |  |
|                     | shock proteins and the Clp protease family. The gene which encodes TorsinA maps to human                           |  |
|                     | chromosome 9q34.   |  |
| Pathways:           | SARS-CoV-2 Protein Interactome   |  |
| Application Details |  |  |
| Application Notes:  | IF(IHC-P) 1:50-200   |  |
|                     | IF(IHC-F) 1:50-200   |  |
|                     | IF(ICC) 1:50-200   |  |
| Restrictions:       | For Research Use only  |  |
| Handling            |  |  |
| Format:             | Liquid   |  |
| Concentration:      | 1 μg/μL  |  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 an 50 % Glycerol.         |  |
| Preservative:       | ProClin  |  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |  |
| Storage:            | -20 °C   |  |
|                     | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |  |
| Storage Comment:    |  |  |
