|          | VICVV |

| Quantity:            | 100 μL                                                                                                                         |
|----------------------|--------------------------------------------------------------------------------------------------------------------------------|
| Target:              | GDF6                                                                                                                           |
| Binding Specificity: | AA 336-410                                                                                                                     |
| Reactivity:          | Human, Rat                                                                                                                     |
| Host:                | Rabbit                                                                                                                         |
| Clonality:           | Polyclonal                                                                                                                     |
| Conjugate:           | This GDF6 antibody is conjugated to Alexa Fluor 350                                                                            |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |
|                      |                                                                                                                                |

#### **Product Details**

| Immunogen:            | KLH conjugated synthetic peptide derived from human GDF6 |
|-----------------------|----------------------------------------------------------|
| Isotype:              | IgG                                                      |
| Cross-Reactivity:     | Human, Rat                                               |
| Predicted Reactivity: | Mouse,Dog,Cow,Horse,Rabbit                               |
| Purification:         | Purified by Protein A.                                   |

### **Target Details**

| Target:           | GDF6                 |
|-------------------|----------------------|
| Alternative Name: | GDF6 (GDF6 Products) |

#### **Target Details**

#### Background:

Synonyms: bmp 13, bmp13, bmp-13, Cartilage Derived Morphogenetic Protein 2, cdmp 2, CDMP2, gdf 6, GDF16, Growth dferentiation factor 6, Growth/dferentiation factor 6, GDF6\_HUMAN.

Background: Growth/differentiation factors (GDFs) are members of the TGF superfamily (1,2). Members of the TGF superfamily are involved in embryonic development and adult tissue homeostasis (1). GDF-1 expression is almost exclusively restricted to the central nervous system and mediates cell differentiation events during embryonic development (3). Neither GDF-3 (Vgr-2) nor GDF-9 contains the conserved cysteine residue which is found in most other TGF superfamily members. GDF-3 is detectable in bone marrow, spleen, thymus and adipose tissue, whereas GDF-9 has only been detected in ovary (4). GDF-5 (also designated CDMP-1) has been shown to induce activation of plasminogen activator, thereby inducing angiogenesis. It is predominantly expressed in long bones during fetal embryonic development and is involved in bone formation. (5). GDF-5 mutations have been identified in mice with the mutation brachypodism (bp), a mutation which affects the length and number of bones in limbs (6). GDF-6 and GDF-7 are closely related to GDF-5 (6). GDF-8 has been shown to be a negative regulator of skeletal muscle mass (1).

#### **Application Details**

| Restrictions:      | For Research Use only |
|--------------------|-----------------------|
|                    | IF(ICC) 1:50-200      |
|                    | IF(IHC-F) 1:50-200    |
| Application Notes: | IF(IHC-P) 1:50-200    |

#### Handling

| Format:            | Liquid                                                                                                             |
|--------------------|--------------------------------------------------------------------------------------------------------------------|
| Concentration:     | 1 μg/μL                                                                                                            |
| Buffer:            | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.         |
| Preservative:      | ProClin                                                                                                            |
| Precaution of Use: | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:           | -20 °C                                                                                                             |

## Handling

| Storage Comment: | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles. |
|------------------|-----------------------------------------------------------------------------------|
| Expiry Date:     | 12 months                                                                         |
