Target Details	
	E25C , Integral membrane protein 2C, Integral membrane protein 3, Itm2c, ITM2C_HUMAN,
	ITM3 antibodyNPD018, Transmembrane protein BRI3.
	Background: Negative regulator of beta amyloid peptide production. May inhibit the processing
	of APP by blocking its access to alpha-and beta-secretase. Binding to the beta-secretase-
	cleaved APP C-terminal fragment is negligible, suggesting that ITM2C is a poor gamma-
	secretase cleavage inhibitor. May play a role in TNF-induced cell death and neuronal
	differentiation.
