anti-COL2 antibody (AA 1401-1487) (Biotin)

Overview

Quantity:	100 µL	
Target:	COL2	
Binding Specificity:	AA 1401-1487	
Reactivity:	Human, Rat, Rabbit	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This COL2 antibody is conjugated to Biotin	
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p))	

## **Product Details**

Immunogen:	KLH conjugated synthetic peptide derived from human Collagen II
lsotype:	IgG
Cross-Reactivity:	Human, Rabbit, Rat
Predicted Reactivity:	Mouse,Chicken
Purification:	Purified by Protein A.

## Target Details

Target:	COL2
Alternative Name:	Collagen 2 (COL2 Products)
Background:	Synonyms: Collagen II alpha 1, COL2A1, COL2A1 protein, collagen, type II, alpha 1, collagen

## Datasheet for ABIN1394155

alpha-1II, type II collagen, alpha-1 type II collagen, alpha1 type II collagen, Col2a1, AOM, Cartilage collagen, Chondrocalcin, COL11A3, Collagen alpha 111 chain precursor, Collagen type II alpha 1 primary osteoarthritis spondyloepiphyseal dysplasia congenital, MGC131516, SEDC. Background: Collagens are highly conserved throughout evolution and are characterized by an uninterrupted "Glycine-X-Y" triplet repeat that is a necessary part of the triple helical structure. For these reasons it is often extremely difficult to generate with specificities to collagens. The development of type specific is dependent on NON DENATURED three dimensional epitopes. This may result in diminished reactivity of some with denatured collagen or formalin fixed, paraffin embedded tissues. Type II collagen is a fibrillar collagen found in cartilage and the vitreous humor of the eye. Collagen type II is essential for the normal embryonic development of the skeleton, for linear growth and for the ability of cartilage to resist compressive forces. Mutations in this gene are associated with achondrogenesis, chondrodysplasia, early onset familial osteoarthritis, SED congenita, Langer Saldino achondrogenesis, Kniest dysplasia, Stickler syndrome type I, and spondyloepimetaphyseal dysplasia Strudwick type. In addition, defects in processing chondrocalcin, a calcium binding protein that is the C propeptide of this collagen molecule, are also associated with chondrodysplasia. There are two transcripts identified for this gene.

## **Application Details**

Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
	50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be
	handled by trained staff only.
Storage:	-20 °C
