## Datasheet for ABIN1394519 anti-PPP2R5C antibody (AA 390-435) (Alexa Fluor 555)

Overview

| Quantity:            | 100 µL   |
|----------------------|--|
| Target:              | PPP2R5C  |
| Binding Specificity: | AA 390-435   |
| Reactivity:          | Rat, Mouse   |
| Host:                | Rabbit   |
| Clonality:           | Polyclonal   |
| Conjugate:           | This PPP2R5C antibody is conjugated to Alexa Fluor 555   |
| Application:         | Western Blotting (WB), Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |

## Product Details

| Immunogen:            | KLH conjugated synthetic peptide derived from human PPP2R5C |
|-----------------------|---|
| Isotype:              | IgG   |
| Cross-Reactivity:     | Mouse, Rat  |
| Predicted Reactivity: | Human,Dog,Cow,Sheep,Horse,Rabbit                            |
| Purification:         | Purified by Protein A.                                      |

## Target Details

| Target:           | PPP2R5C                    |
|-------------------|----------------------------|
| Alternative Name: | PPP2R5C (PPP2R5C Products) |

|                     | Background: In eukaryotes, the phosphorylation and dephosphorylation of proteins on serine      |
|                     | and threonine residues is an essential means of regulating a broad range of cellular functions, |
|                     | including division, homeostasis and apoptosis. A group of proteins that are intimately involved |
|                     | in this process are the protein phosphatases. In general, the protein phosphatase (PP)          |
|                     | holoenzyme is a trimeric complex composed of a regulatory subunit, a variable subunit, and a    |
|                     | catalytic subunit. Four major families of protein phosphatase catalytic subunits have been      |
|                     | identified, designated PP1, PP2A, PP2B (calcineurin) and PP2C. An additional protein            |
|                     | phosphatase catalytic subunit, PPX (also known as PP4) is a putative member of a novel PP       |
|                     | family. The PP2A family comprises subfamily members PP2A Alpha and PP2A Beta. The PP2A          |
|                     | catalytic subunit associates with a variety of regulatory subunits. Regulatory subunits include |
|                     | PP2A-A-Alpha and -A-Beta, PP2A-B-Alpha and -B-Beta, PP2A-C-Alpha and -C-Beta, PP2A-B56-         |
|                     | Alpha, -B56-Beta, -B56-gamma and -B56-Delta.  |
