Datasheet for ABIN1395057

**anti-GABRQ antibody (AA 211-320) (Alexa Fluor 350)**

## Overview

Quantity:	100 µL
Target:	GABRQ
Binding Specificity:	AA 211-320
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This GABRQ antibody is conjugated to Alexa Fluor 350
Application:	Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))

## Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human GABRQ/GABA A Receptor ta
Isotype:	IgG
Predicted Reactivity:	Human,Mouse,Rat,Rabbit
Purification:	Purified by Protein A.

## Target Details

Target:	GABRQ
Alternative Name:	GABRQ/GABA A Receptor theta ( <a href="#">GABRQ Products</a> )
Background:	Synonyms: gamma aminobutyric acid GABA receptor, theta, Gamma aminobutyric acid

## Target Details

receptor theta subunit precursor, gamma aminobutyric acid receptor, theta, THETA, GBRT\_HUMAN.

Background: Gamma-aminobutyric acid type A (GABAA) receptors mediate inhibitory neurotransmission in the mammalian central nervous system. The receptor exists as a pentameric ion channel composed by heteromeric combinations of alpha, beta, gamma, delta, epsilon, theta, or pi subunits. Only specific subunit combinations produce viable receptors, while others never translocate to the cell surface from the ER where they are synthesized, and subsequently degraded. The theta subunit forms a receptor in combination with alpha3 subunits in monoaminergic cell groups. These receptors, found especially in the septum, preoptic areas, hypothalamic nuclei, amygdala and thalamus, likely have unique pharmacological properties linked to their expression in this particular cell type and not cholinergic cell groups, and may play a role in opiate withdrawal symptoms.

## Application Details

Application Notes: IF(IHC-P) 1:50-200  
IF(IHC-F) 1:50-200  
IF(ICC) 1:50-200

Restrictions: For Research Use only

## Handling

Format: Liquid

Concentration: 1 µg/µL

Buffer: Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.

Preservative: ProClin

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Storage: -20 °C

Storage Comment: Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.

Expiry Date: 12 months
