Datasheet for ABIN1395133 anti-GRID1 antibody (AA 501-600) (Biotin)

Overview

Quantity:	100 µL	
Target:	GRID1	
Binding Specificity:	AA 501-600	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This GRID1 antibody is conjugated to Biotin	
Application:	ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human GRID1
lsotype:	lgG
Cross-Reactivity:	Human
Predicted Reactivity:	Mouse,Rat,Dog,Cow,Sheep,Horse,Chicken
Purification:	Purified by Protein A.
Target Details	
Target:	GRID1
Alternative Name:	GRID1 (GRID1 Products)

Target Details	
Background:	Synonyms: GluR delta 1, GluR delta 1 subunit, GluR delta-1 subunit, Glutamate receptor delta 1 subunit, Glutamate receptor delta-1 subunit, Glutamate receptor ionotropic delta 1, GRID 1, Grid1, GluD1, GRID1_HUMAN, KIAA1220.
	Background: Glutamate receptors mediate most excitatory neurotransmissions in the brain and
	play an important role in neural plasticity, neural development and neurodegeneration.
	lonotropic glutamate receptors are divided into two categories, namely NMDA receptors and
	kainate/AMPA receptors, both of which contain glutamate-gated, cation-specific ion channels.
	Kainate/AMPA receptors consist of seven structurally related subunits, designated GluR-1 to -7,
	and are primarily responsible for fast excitatory neurotransmissions carried out by glutamate.
	GluR-delta 1 (Glutamate receptor delta-1 subunit), also known as GRID1, is a multi-pass
	membrane protein that belongs to the kainate/AMPA receptor family and is expressed primarily
	in the brain. Localized to the cell junction and the postsynaptic cell membrane, GluR-delta 1
	functions as a glutamate receptor that regulates synaptic transmissions in the central nervous
	system (CNS) and is thought to play an important role in synaptic plasticity. Defects in the gene
	encoding GluR-delta 1 are associated with schizophrenia, a chronic and severe brain disorder.
Gene ID:	2894
UniProt:	Q9ULK0
Application Details	
Application Notes:	IHC-P 1:200-400
	IHC-F 1:100-500
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 µg/µL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
