Datasheet for ABIN1399492 anti-ELL antibody (AA 531-620) (Alexa Fluor 488)

antibodies.com

Overview

Quantity:	100 μL	
Target:	ELL	
Binding Specificity:	AA 531-620	
Reactivity:	Human	
Host:	Rabbit	
Clonality:	Polyclonal	
Conjugate:	This ELL antibody is conjugated to Alexa Fluor 488	
Application:	Immunofluorescence (Cultured Cells) (IF (cc)), Immunofluorescence (Paraffin-embedded Sections) (IF (p))	

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human ELL	
Isotype:	lgG	
Predicted Reactivity:	Human,Mouse,Rat,Dog,Cow,Horse	
Purification:	Purified by Protein A.	
Target Details		

Target:ELLAlternative Name:ELL (ELL Products)Background:Synonyms: ELL_HUMAN, Eleven nineteen lysine rich leukemia gene, Eleven-nineteen lysine-rich

	leukemia protein, ELL1, elongation factor RNA polymerase II, Men, RNA polymerase II		
	elongation factor, RNA polymerase II elongation factor ELL.		
	Background: Eukaryotic RNA polymerase II mediates the synthesis of mature and functional		
	messenger RNA. This is a multistep process, called the transcription cycle, that includes five		
	stages: preinitiation, promoter, clearance, elongation and termination. Elongation is thought to		
	be a critical stage for the regulation of gene expression. ELL (11-19 lysine-rich leukemia		
	protein), also designated MEN, functions as an RNA polymerase II elongation factor that		
	increases the rate of transcription by suppressing transient pausing by RNA polymerase II. It is		
	also thought to regulate cellular proliferation. ELL is abundantly expressed in peripheral blood		
	leukocytes, skeletal muscle, placenta and testis, with lower expression in spleen, thymus, heart,		
	brain, lung, kidney, liver and ovary. The gene encoding human ELL, which maps to chromosome		
	19p13.1, is one of several genes that undergo translocation with the MLL gene on chromosome		
	11q23 in acute myeloid leukemia. MLL (myeloid/lymphoid leukemia, also designated ALL-1 and		
	HRX) regulates embryonal and hematopoietic development.		
Gene ID:	8178		
Application Details			
Application Notes:	IF(IHC-P) 1:50-200		
	IF(IHC-F) 1:50-200		
	IF(ICC) 1:50-200		
Restrictions:	For Research Use only		
Handling			

Format:	Liquid
Concentration:	1 µg/µL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
