## Datasheet for ABIN1401646 anti-TRIM39 antibody (Alexa Fluor 488)

| Overview          |   |
|-------------------|---|
| Quantity:         | 100 μL  |
| Target:           | TRIM39  |
| Reactivity:       | Human, Mouse, Rat   |
| Host:             | Rabbit  |
| Clonality:        | Polyclonal  |
| Conjugate:        | This TRIM39 antibody is conjugated to Alexa Fluor 488   |
| Application:      | Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p))               |
| Product Details   |   |
| Immunogen:        | KLH conjugated synthetic peptide derived from human RNF23                                     |
| Isotype:          | lgG   |
| Cross-Reactivity: | Human, Mouse, Rat   |
| Purification:     | Purified by Protein A.  |
| Target Details    |   |
| Target:           | TRIM39  |
| Alternative Name: | RNF23 (TRIM39 Products)   |
| Background:       | Synonyms: Ring finger protein 23, RNF23, Testis abundant finger protein, TFP, TFP RING        |
|                   | FINGER PROTEIN 23, TRIM39, Tripartite mot containing 39, TRI39_HUMAN.                         |
|                   | Background: The RING-type zinc finger motif is present in a number of viral and eukaryotic    |
|                   | proteins and is made of a conserved cysteine-rich domain that is able to bind two zinc atoms. |

|                     | Proteins that contain this conserved domain are generally involved in the ubiquitination         |
|---------------------|--|
|                     | pathway of protein degradation. RNF23 (RING finger protein 23), also known as tripartite motif-  |
|                     | containing protein 39 (TRIM39) or testis-abundant finger protein, is a 518 amino acid protein    |
|                     | belonging to the TRIM/RBCC family that is known to interact with MOAP1. Ubiquitously             |
|                     | expressed and existing as two alternatively spliced isoforms, RNF23 is found at highest levels   |
|                     | in spleen, testis, brain, kidney, liver, heart and skeletal muscle. RNF23 typically localizes to |
|                     | cytosol but shifts to mitochondria upon co-localization with MOAP1, a short-lived, pro-apoptotic |
|                     | protein which RNF23 prevents from becoming poly-ubiquitinated and degraded, thereby              |
|                     | facilitating apoptosis. RNF23 contains one B box-type zinc finger, a B30.2/SPRY domain and a     |
|                     | single RING-type zinc finger.  |
| Gene ID:            | 56658  |
| Application Details |  |
| Application Notes:  | IF(IHC-P) 1:50-200   |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Concentration:      | 1 µg/µL  |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS ( pH 7.4) with 1 % BSA, 0.03 % Proclin300 and     |
|                     | 50 % Glycerol.   |
| Preservative:       | ProClin  |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be              |
|                     | handled by trained staff only.   |
| Storage:            | -20 °C   |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                |
|                     | ······································   |
