Target Details

Target:	PROZ
Alternative Name:	Protein Z (PROZ Products)
Background:	Synonyms: Protein Z, vitamin K dependent plasma glycoprotein, PROZ, PROZ_HUMAN, PZ antibody Vitamin K-dependent protein Z.
	Background: This gene encodes a liver vitamin K-dependent glycoprotein that is synthesized in
	the liver and secreted into the plasma. The encoded protein plays a role in regulating blood

Target Details

coagulation by complexing with protein Z-dependent protease inhibitor to directly inhibit
activated factor X at the phospholipid surface. Deficiencies in this protein are associated with
an increased risk of ischemic arterial diseases and fetal loss. Mutations in this gene are the
cause of protein Z deficiency. Alternate splicing results in multiple transcript variants. [provided
