| Overview          |                                                                                 |
|-------------------|---------------------------------------------------------------------------------|
| Quantity:         | 100 μL                                                                          |
| Target:           | BAT5 (ABHD16A)                                                                  |
| Reactivity:       | Human, Mouse, Rat                                                               |
| Host:             | Rabbit                                                                          |
| Clonality:        | Polyclonal                                                                      |
| Conjugate:        | This BAT5 antibody is conjugated to Alexa Fluor 350                             |
| Application:      | Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |
| Product Details   |                                                                                 |
| Immunogen:        | KLH conjugated synthetic peptide derived from human BAT5                        |
| Isotype:          | IgG                                                                             |
| Cross-Reactivity: | Human, Mouse, Rat                                                               |
| Purification:     | Purified by Protein A.                                                          |
| Target Details    |                                                                                 |
| Target:           | BAT5 (ABHD16A)                                                                  |
| Alternative Name: | BAT5 (ABHD16A Products)                                                         |
| Background:       | Synonyms: D6S82E, G5 antibody HLA B associated transcript 5, NG26, Protein G5,  |

Background: A cluster of genes, BAT1-BAT5, has been localized in the vicinity of the genes for

TNF alpha and TNF beta. These genes are all within the human major histocompatibility

ABHGA\_HUMAN

## **Target Details**

| rarget Details      |                                                                                                                    |
|---------------------|--------------------------------------------------------------------------------------------------------------------|
|                     | complex class III region. The protein encoded by this gene is thought to be involved in some aspects of immunity.  |
| Gene ID:            | 7920                                                                                                               |
| Application Details |                                                                                                                    |
| Application Notes:  | IF(IHC-P) 1:50-200                                                                                                 |
| Restrictions:       | For Research Use only                                                                                              |
| Handling            |                                                                                                                    |
| Format:             | Liquid                                                                                                             |
| Concentration:      | 1 μg/μL                                                                                                            |
| Buffer:             | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.         |
| Preservative:       | ProClin                                                                                                            |
| Precaution of Use:  | This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only. |
| Storage:            | -20 °C                                                                                                             |
| Storage Comment:    | Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.                                  |
| Expiry Date:        | 12 months                                                                                                          |
