## Target Details

	Background: Can cross-link actin filaments into both network and bundle structures (By
	similarity). May modulate changes in actin filament integrity and induce lamellipodia formation.
	May function as an adapter molecule that links other proteins, such as SRC and PKC to the
	actin cytoskeleton. Seems to play a role in the development and progression of prostate
	adenocarcinoma by regulating cell-matrix adhesions and migration in the cancer cells.
Gene ID:	60312
UniProt:	Q8N556
