Datasheet for ABIN1409342 anti-Nogo B Receptor antibody (AA 167-210) (HRP)

Overview

Quantity:	100 μL
Target:	Nogo B Receptor (NUS1)
Binding Specificity:	AA 167-210
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Conjugate:	This Nogo B Receptor antibody is conjugated to HRP
Application:	Western Blotting (WB), ELISA, Immunohistochemistry (Paraffin-embedded Sections) (IHC (p)), Immunohistochemistry (Frozen Sections) (IHC (fro))

Product Details

Immunogen:	KLH conjugated synthetic peptide derived from human NGBR/Nogo B receptor
lsotype:	lgG
Predicted Reactivity:	Human,Mouse,Rat,Dog,Cow,Sheep,Pig,Horse
Purification:	Purified by Protein A.
Target Details	
Target:	Nogo B Receptor (NUS1)
Alternative Name:	NGBR/Nogo B receptor (NUS1 Products)
Background:	Synonyms: C6orf68, NGBR, nuclear undecaprenyl pyrophosphate synthase 1 homolog, NUS1,

	NGBR_HUMAN, Dehydrodolichyl diphosphate synthase complex subunit NUS1, Cis-
	prenyltransferase subunit NgBR, Nogo-B receptor.
	Background: Nogo is an oligodendrocyte-specific member of the Reticulon family and is a
	component of CNS white matter that inhibits axon outgrowth, induces collapse of growth
	cones of chick dorsal root ganglion cells, and inhibits the spreading of 3T3 fibroblasts. Nogo is
	expressed by oligodendrocytes but not by Schwann cells and associates primarily with the
	endoplasmic reticulum. Nogo exists in three different splice forms, Nogo-A, -B and -C. NgBR
	(Nogo-B receptor), also known as nuclear undecaprenyl pyrophosphate synthase 1 homolog, is
	a 293 amino acid single-pass type I membrane protein that acts as a specific receptor for the
	amino-terminus of Nogo-B. Through this interaction, NgBR is involved in the regulation of
	vascular remodeling and angiogenesis. NgBR also enhances Niemann-Pick type C2 protein
	(NPC2) stabilization. Knockdown of NgBR mRNA leads to decreased NPC2 levels, which results
	in the hallmarks of NPC2 mutation: increased intracellular cholesterol accumulation and a loss
	of sterol sensing.
Gene ID:	116150
UniProt:	Q96E22
Application Details	
Application Notes:	WB 1:300-5000
	IHC-P 1:200-400
	IHC-F 1:100-500
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and
	50 % Glycerol.
Preservative:	ProClin
Precaution of Lise:	This product contains ProClin: a POISONOUS AND HAZADDOUS SUBSTANCE which should be

Precaution of Use: This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.

Handling Advice: Do NOT add Sodium Azide! Use of Sodium Azide will inhibit enzyme activity of horseradish

Handling

	peroxidase.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
