Datasheet for ABIN1418711 anti-Arylsulfatase H antibody (Cy3)

Overview

| Overview | |
|-------------------|---------------------------------------------------------------------------------------------------------|
| Quantity: | 100 μL |
| Target: | Arylsulfatase H (ARSH) |
| Reactivity: | Human |
| Host: | Rabbit |
| Clonality: | Polyclonal |
| Conjugate: | This Arylsulfatase H antibody is conjugated to Cy3 |
| Application: | Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) |
| Product Details | |
| Immunogen: | KLH conjugated synthetic peptide derived from human ARSH |
| lsotype: | IgG |
| Cross-Reactivity: | Human |
| Purification: | Purified by Protein A. |
| Target Details | |
| Target: | Arylsulfatase H (ARSH) |
| Alternative Name: | ARSH (ARSH Products) |
| Background: | Synonyms: Arylsulfatase H, ASH, ARSH_HUMAN. |
| | Background: Sulfatases hydrolyze sulfate esters from sulfated steroids, carbohydrates, |
| | proteoglycans and glycolipids. They are involved in hormone biosynthesis, modulation of cell |
| | signaling and degradation of macromolecules. Arylsulfatase H, also known as ARSH, is a 562 |

| | amino acid protein that belongs to the sulfatase family of bone and cartilage matrix proteins. |
|------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | Localized to the plasma membrane, Arylsulfatase H uses calcium as a cofactor to hydrolyze |
| | sulfate esters. The gene encoding Arylsulfatase D maps to human chromosome X, which |
| | contains nearly 153 million base pairs and houses over 1,000 genes. In conjunction with |
| | chromosome Y, chromosome X is responsible for sex determination. There are a number of |
| | conditions related to an abnormal number and combination of sex chromosomes, some of |
| | which include Turner's syndrome, color blindness, hemophilia and Duchenne muscular |
| | dystrophy. |
| Gene ID: | 347527 |
| Application Details | |
| Application Notes: | IF(IHC-P) 1:50-200 |
| Restrictions: | For Research Use only |
| Handling | |
