anti-C1orf163 antibody (Cy3)

Overview 100 μL Quantity: C1orf163 Target: Reactivity: Human, Rat, Mouse Host: Rabbit Clonality: Polyclonal Conjugate: This C1orf163 antibody is conjugated to Cy3 Western Blotting (WB), Immunofluorescence (Paraffin-embedded Sections) (IF (p)) Application: **Product Details**

Immunogen:	KLH conjugated synthetic peptide derived from human C1orf163
Isotype:	IgG
Cross-Reactivity:	Human, Mouse, Rat
Purification:	Purified by Protein A.

Target Details

Target:	C1orf163
Alternative Name:	C1orf163 (C1orf163 Products)
Background:	Synonyms: Chromosome 1 open reading frame 163, FLJ12439, Hcp beta lactamase like protein C1orf163, Hypothetical protein LOC65260, SELR1_HUMAN.
	Background: Chromosome 1 is the largest human chromosome spanning about 260 million
	base pairs and making up 8 % of the human genome. There are about 3,000 genes on

chromosome 1, and considering the great number of genes there are also a large number of diseases associated with chromosome 1. Notably, the rare aging disease Hutchinson-Gilford progeria is associated with the LMNA gene which encodes lamin A. When defective, the LMNA gene product can build up in the nucleus and cause characteristic nuclear blebs. The mechanism of rapidly enhanced aging is unclear and is a topic of continuing exploration. The MUTYH gene is located on chromosome 1 and is partially responsible for familial adenomatous polyposis. Stickler syndrome, Parkinsons, Gaucher disease and Usher syndrome are also associated with chromosome 1. A breakpoint has been identified in 1q which disrupts the DISC1 gene and is linked to schizophrenia. Aberrations in chromosome 1 are found in a variety of cancers including head and neck cancer, malignant melanoma and multiple myeloma. The C1orf163 gene product has been provisionally designated C1orf163 pending further characterization.

Gene ID:

65260

Application Details

Application Notes:	IF(IHC-P) 1:50-200
Restrictions:	For Research Use only
Handling	

Format:	Liquid
Concentration:	1 μg/μL
Buffer:	Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1 % BSA, 0.03 % Proclin300 and 50 % Glycerol.
Preservative:	ProClin
Precaution of Use:	This product contains ProClin: a POISONOUS AND HAZARDOUS SUBSTANCE, which should be handled by trained staff only.
Storage:	-20 °C
Storage Comment:	Store at -20°C. Aliquot into multiple vials to avoid repeated freeze-thaw cycles.
Expiry Date:	12 months
