

## Datasheet for ABIN1447147

### Human IL-1 b ELISpot Kit

[Go to Product page](#)

#### Overview

|              |                  |
|--------------|------------------|
| Quantity:    | 96 tests         |
| Target:      | IL-1 beta (IL1B) |
| Reactivity:  | Human            |
| Application: | ELISpot          |

#### Product Details

|             |                                                                                                                                                                               |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Components: | Pre-coated ELISpot kits include precoated PVDF plates, Detection antibody, Alkaline phosphatase conjugate, BSA, BCIP/NBT ready-to-use substrate buffer. With pre-coated plate |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Target Details

|                   |                                          |
|-------------------|------------------------------------------|
| Target:           | IL-1 beta (IL1B)                         |
| Alternative Name: | IL-1 B ( <a href="#">IL1B Products</a> ) |

#### Application Details

|               |                                      |
|---------------|--------------------------------------|
| Comment:      | ELISpot Kit<br>With pre-coated plate |
| Plate:        | Pre-coated                           |
| Restrictions: | For Research Use only                |

#### Handling

|          |      |
|----------|------|
| Storage: | 4 °C |
|----------|------|

## Handling

---

Storage Comment: Declared stable after 7 days at room temperature. Do not freeze.
