## Overview

|                      |                                     |
|----------------------|-------------------------------------|
| Quantity:            | 100 µL                              |
| Target:              | Raly (RALY)                         |
| Binding Specificity: | AA 71-120                           |
| Reactivity:          | Human, Mouse, Rat                   |
| Host:                | Rabbit                              |
| Clonality:           | Polyclonal                          |
| Conjugate:           | This Raly antibody is un-conjugated |
| Application:         | Western Blotting (WB), ELISA        |

## Product Details

|               |                                                                                             |
|---------------|---------------------------------------------------------------------------------------------|
| Immunogen:    | The antiserum was produced against synthesized peptide derived from human RALY.             |
| Isotype:      | IgG                                                                                         |
| Specificity:  | RALY Antibody detects endogenous levels of RALY.                                            |
| Purification: | The antibody was purified from rabbit antiserum by affinity-chromatography using immunogen. |

## Target Details

|                   |                                                                                                         |
|-------------------|---------------------------------------------------------------------------------------------------------|
| Target:           | Raly (RALY)                                                                                             |
| Alternative Name: | RALY ( <a href="#">RALY Products</a> )                                                                  |
| Background:       | Synonyms: autoantigen p542, hnRNP associated with lethal yellow homolog, P542, RNA-binding protein Raly |

## Target Details

|                   |                        |
|-------------------|------------------------|
|                   | NCBI Gene Symbol: RALY |
| Molecular Weight: | 32 kDa                 |
| Gene ID:          | 22913                  |
| UniProt:          | <a href="#">Q9UKM9</a> |

## Application Details

|                    |                                 |
|--------------------|---------------------------------|
| Application Notes: | WB: 1:500~1:1000 ELISA: 1:10000 |
| Restrictions:      | For Research Use only           |

## Handling

|                    |                                                                                                                                         |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------|
| Format:            | Liquid                                                                                                                                  |
| Concentration:     | 1 mg/mL                                                                                                                                 |
| Buffer:            | phosphate buffered saline (without Mg <sup>2+</sup> and Ca <sup>2+</sup> ), pH 7.4, 150 mM NaCl, 0.02 % sodium azide and 50 % glycerol. |
| Preservative:      | Sodium azide                                                                                                                            |
| Precaution of Use: | This product contains sodium azide: a POISONOUS AND HAZARDOUS SUBSTANCE which should be handled by trained staff only.                  |
| Storage:           | -20 °C                                                                                                                                  |
| Storage Comment:   | Stable at -20°C for at least 1 year.                                                                                                    |
