LRKKLDCKDT DSVFCYVNSV FAPGLDEGVG GLWRCFKVDD QLI  Specificity: Aspergillus clavatus (strain ATCC 1007 / CBS 513.65 / DSM 816  Characteristics: Please inquire if you are interested in this recombinant protein e	SAPIPDD EHGADLPLTM	
Specificity: Aspergillus clavatus (strain ATCC 1007 / CBS 513.65 / DSM 816  Characteristics: Please inquire if you are interested in this recombinant protein e	/FKISA SQKFETVVKF	
Characteristics: Please inquire if you are interested in this recombinant protein e	/SYSMTP AFG	
	/ NCTC 3887 / NRRL 1)	
cells or by baculovirus infection. Be aware about differences in p	xpressed in E. coli, mammalien	
	rice and lead time.	
Purity: > 90 %		
Target Details		
Target: ATG12		
Alternative Name: Ubiquitin-like protein ATG12 (atg12) (ATG12 Products)	Ubiquitin-like protein ATG12 (atg12) (ATG12 Products)	

#### **Target Details**

Background:	Recommended name: Ubiquitin-like protein ATG12.  Alternative name(s): Autophagy-related protein 12	
UniProt:	A1CTJ1	
Pathways:	Autophagy	

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

#### Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
