antibodies -online.com

Overview

Quantity:	1 mg
Target:	SAH1
Protein Characteristics:	AA 1-450
Origin:	Candida albicans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SAH1 protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MSSAPATNYK VADISLAAFG RKDIELSENE MPGLMYIRKK YGPSQPLKGA RIAGCLHMTI
	QTAVLIETLV ALGAEVTWSS CNIFSTQDHA AAAIAAAGVP VFAWKGETEE EYQWCIEQQL

	VMSCSFSNQV LAQIALFNAD NKEFREKFPE FAKTGPFDVG VHLLPKVLDE TVARCHLDHL
	GAKLTTLTET QAEYLGIPEE GPYKADIYRY
Specificity:	Candida albicans (strain SC5314 / ATCC MYA-2876) (Yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalier
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** SAH1 Target: Alternative Name Adenosylhomocysteinase (SAH1) (SAH1 Products) Background: Recommended name: Adenosylhomocysteinase. Short name= AdoHcyase. EC= 3.3.1.1. Alternative name(s): S-adenosyl-L-homocysteine hydrolase UniProt: P83783 **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
