Datasheet for ABIN1458570
CDC42 Protein (AA 1-188) (His tag)

Overview

Quantity:	1 mg
Target:	CDC42
Protein Characteristics:	AA 1-188
Origin:	Candida albicans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CDC42 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MQTIKCVVVG DGAVGKTCLL ISYTTSKFPA DYVPTVFDNY AVTVMIGDEP FTLGLFDTAG QEDYDRLRPL SYPSTDVFLV CFSVISPASF ENVKEKWFPE VHHHCPCGVPI IIVGTQTDLR NDDVILQRLH RQKLSPITQE QGEKLAKELR AVKYVECSAL TQRGLKTVFD EAIVAALPEP VIKSKKCC
Specificity:	Candida albicans (strain SC5314 / ATCC MYA-2876) (Yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	CDC42
---------	-------

Target Details

Alternative Name:	Cell division control protein 42 homolog (CDC42) (CDC42 Products)
Background:	Recommended name: Cell division control protein 42 homolog
UniProt:	P0CY33
Pathways:	MAPK Signaling , Microtubule Dynamics , RTK Signaling , WNT Signaling , TCR Signaling , EGFR Signaling Pathway , Regulation of Actin Filament Polymerization , Regulation of Muscle Cell Differentiation , Cell-Cell Junction Organization , Maintenance of Protein Location , Skeletal Muscle Fiber Development , Signaling Events mediated by VEGFR1 and VEGFR2 , EGFR Downregulation , VEGF Signaling

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
